Subject: Adams Proposal Support

Just a quick note urging you to pass the Adams proposal for comp plan implementation. The process of creating the plan took a very long time and incorporated an exhaustive amount of feedback (literally - I'm exhausted, so I can't begin to imagine you all!), so the broad strokes are already in place. The floating plan is jaw-droppingly slow and inefficient. Time is crucial this far into our housing crisis, and while I'd prefer significantly faster than three years, the Adams proposal is a reasonable plan that gives us a visible light at the end of the tunnel. Please pass it!

Thanks for your work!
