Subject: 2250 Ann Arbor Saline Road

Hello,

I am writing to voice my concern over the paved roadway connection from the 2250 condo development to Lambeth Rd.

I understand it will initially be used for emergency vehicles, but in the future what would stop it from being used for general traffic?

We invested in a house in the Landsdowne area 3 years ago when we moved from out of state because it is a quiet subdivision. It's unfortunate that this cut through street could contribute to the loss of integrity in this neighborhood.

We have a small child and another on the way, and we already deal with traffic going over the speed limit on Chaucer. Our house will be directly across from Ascot on Chaucer De. where the road would lead to Scio Church, and we are quite worried about the increased traffic and noise this cut through road could cause.

I hope the city planning commission and condo development will reconsider this unnecessary road to help save the integrity of one of the greatest neighborhoods in Ann Arbor.

Best Regards,
