Subject: RE: Sewer service along Riverview Drive?

Hello again,

Thanks so much for your input. I forwarded a copy to Planning Manager Brett Lenart. All residents with an interest in this project (both pro and con) are encouraged to attend the January 18, 2017, Planning Commission hearing on the proposed FY2018-FY2023 Capital Improvement Plan and express their opinions on the timing of these proposed projects.

Hello Deb,

Thank you very much for your prompt reply. We will certainly be in touch with you the coming Wednesday.

With the thought that it may be relevant to your considerations just now underway, I attach a copy of a letter sent in 2014 to Liz Rolla, expressing strong interest by my wife and me and several of our Riverview neighbors in having Riverview city sewer service. To my knowledge the views of my neighbors remain the same, but in case not, I copy them on this message.

Thanks and best wishes,
Jim and Cathy

Hi Jim and Kathy,

We are in the home stretch of putting the draft CIP together. At the moment, I am not sure of the year until I complete both water and sewer asset groups. I will be done with the draft by end of day on Wednesday, so if you can shoot me an email late Wednesday, I should know what year it is being proposed.

Thanks!

Deb Gosselin

Dear Ms. Gosselin,

My wife and I write in hopes of obtaining information as to possible plans by the city to extend sewer service along Riverview Drive, especially now that the Geddes Sewer and Water Project is essentially complete. In the past we were in touch with Ms. Elizabeth Rolla for obtaining such information, but email to her now bounces. You were copied on the email messages from Ms. Rolla and so we are hoping that you might be able to help us or could put us in touch with someone else who could.

If it would be helpful we could chat in a phone call (our home number is 7 [REDACTED]) or an office meeting.

We look forward to hearing back.

Many thanks,

Jim and Cathy Allen
