Subject: Question about Thurston elementary construction property lines

Dear Council People and planning committee,

I am a Thurston elementary neighborhood resident who is concerned about the environmental impacts of the new school. Already, the trails have started flooding due to the removal of the oak savanna. This is concerning both for the local ecosystem and the building infrastructure.

It has been brought to my attention that the city of Ann Arbor should actually own part of the property that must be modified. Can you confirm the factuality of the city owning this property? If so, can you take measures to require AAPS to pick a more sustainable site?

-Ali Hassani
