SECTION I - GENERAL INFORMATION

A. OBJECTIVE

The City of Ann Arbor is seeking an Administrator to operationalize and administer the Home Energy Advisor (HEA) Program. Activities include maintaining and sharing information on residential building decarbonization, coordinating and completing building assessments, assisting residents with identifying rebates and incentives for residential building decarbonization, and responding to resident requests for building-related decarbonization assistance. This work also includes coordinating with other City programs related to building decarbonization to ensure a seamless customer experience.

The City is seeking these services for a period of 36 months, with the City reserving the option to extend the contract for up to two, 1-year terms. The successful respondent must demonstrate experience with administering home energy programs, conducting energy assessments, providing customized guidance and support to residents, and program management expertise. The Administrator will work closely with City staff to establish the HEA Program, building off a successful pilot launched by the City and collaborators in the summer of 2023. The OSI Director (or their designee) will oversee the direction and quality of work under this contract.

SECTION II - SCOPE OF SERVICES

1. Background

A²ZERO Plan

In 2019, the Ann Arbor City Council declared a climate emergency and established a goal of a just transition to community-wide carbon neutrality by 2030. City Council directed the Office of Sustainability and Innovations (OSI) to prepare a plan to achieve this goal and in June of 2020, the living A²ZERO Carbon Neutrality Plan was adopted. The A²ZERO Plan includes seven overarching strategies and 44 individual actions that collectively achieve the community's climate goals. The first three strategies of A²ZERO call for powering the entire community with 100% renewable energy; electrifying appliances, buildings, and vehicles; and achieving a significant reduction in energy usage (deep energy efficiency investments). Given that roughly 23% of local greenhouse gas emissions come from the residential sector, staff in the City's OSI are acutely aware of the need for customized programs to help this market segment decarbonize.

Home Energy Advisor Service

OSI realizes, however, that residents of Ann Arbor face numerous challenges to home decarbonization, including our old building stock, a cold climate, high electricity costs, ubiquitous use of fossil gas for heating, lack of local control over building codes, limited contractor experience with electrification, inequitable access to rebates and incentives in our most marginalized communities, and the overall complexity of the needed retrofits.

The OSI has been working to address these barriers through a variety of initiatives, including:

1. A Solarize program that educates and motivates hundreds of residents a year on renewable energy, electrification and efficiency, helping deploy over 560 individual residential solar systems in 3 years.
2. A contractor Electrification Badge that OSI developed with Michigan Saves, the State's green bank, to educate contractors and help residents locate skilled tradespeople to assist them with their electrification projects.
3. The State of Michigan's first energy and water benchmarking ordinance to protect and educate renters and tenants about the energy performance of a given building.
4. An emerging Green Rental Housing program to significantly improve the efficiency, health, safety, and comfort of rentals in the City.
5. A Home Energy Rating Disclosure program to disclose a Home Energy Score (HES) at time of listing to ensure consumer protection. OSI is hiring a Home Energy Assessor to provide these assessments to single family homes, free of charge and is also exploring leveraging a new AmeriCorps program that may provide additional home energy assessment capacity. Note that anyone interested in responding to this RFP must ensure any assessments completed through the Home Energy Advisor Program are compatible with the U.S.

Department of Energy Home Energy Score.

6. Work towards creation of the nation's first carbon neutral existing low-income neighborhood (in Bryant neighborhood).
7. The creation of local energy rebates and incentives to support residential (and soon, commercial) building decarbonization, including energy efficiency improvements, installation of efficient all-electric equipment, electrical upgrades, renewable energy installations, and energy storage deployments. To maximize the impact of the rebates on energy use and emissions, rebate applicants will be encouraged to receive information on decarbonizing their building through the Home Energy Advisor Program.

The City's engagement with these initiatives and associated stakeholders has been (and continues to be) robust, and the feedback received around barriers is what has informed this Home Energy Advisor (HEA) Program RFP.

The complexity of building decarbonization can be overwhelming, especially for historically underserved individuals where remediation (both buildings and relationships) is needed prior to considering decarbonization, as well as for those with more means who are highly motivated to make change but have no idea where to start or who to trust. The City of Ann Arbor aims to reduce these complexities through the administration of the HEA Program. In the summer of 2023, Ann Arbor designed and completed a pilot of a HEA that serves as a one-stop-shop where residents (homeowners, renters and landlords) can get: home energy assessments; assistance with project selection; connections to contractors; identification of available rebates, incentives, financing and income-qualified programs; bid reviews; and customized home decarbonization support. In the pilot, Ann Arbor and its collaborators also developed a template "Path to Zero" which is delivered to every individual engaging with the HEA. The Path to Zero details the specific steps, timelines, and opportunities available for that individual to fully decarbonize their home. The City of Ann Arbor strives to make the HEA free of charge to residents as this program is a key part of expediting the efficiency and electrification measures needed to achieve a just transition to carbon neutrality while reducing the likelihood of ongoing investment in fossil fuel equipment at time of appliance replacement.

The pilot HEA was completed in August 2023, assisting 14 residents representing various building stock, ownership models, demographics, and needs. As part of the pilot, an Operations Guide was developed, as well as Deliverables including a Path to Zero, and an Energy Assessment report. Project collaborators delivered a post-pilot Report, with lessons learned and recommendations for improvements moving forward. The City of Ann Arbor is currently revising these documents and preparing them for circulation. As soon as these documents are ready, they will be posted as an addendum to this RFP. NOTE: it is expected that all interested vendors will review these materials in advance of preparing a response to this RFP and will discuss, in their bid response, how they are equipped to deliver the Path to Zero and Energy Assessment Report to all HEA Program participants.

2. Objective

The City of Ann Arbor is seeking an Administrator to operationalize and administer the Home Energy Advisor (HEA) Program. Activities include maintaining and sharing information on residential building decarbonization, coordinating and completing building assessments, assisting residents with identifying rebates and incentives for residential building decarbonization, and responding to resident requests for building-related decarbonization assistance. This work also includes coordinating with other City programs related to building decarbonization to ensure a seamless customer experience.

The City is seeking these services for a period of 36 months, with the City reserving the option to extend the contract for up to two, 1-year terms. The successful respondent must demonstrate experience with administering home energy programs, conducting energy assessments, providing customized guidance and support to residents, and program management expertise. The Administrator will work closely with City staff to establish the HEA Program, building off a successful pilot launched by the City and collaborators in the summer of 2023. The OSI Director (or their designee) will oversee the direction and quality of work under this contract.

The design and administration of the HEA Program needs to meet the City and the Ann Arbor Office of Sustainability and Innovations (OSI) goals, including:

1. Equity: Reduce energy burden and prioritize services to disadvantaged and climate justice communities in Ann Arbor.
2. Climate: Make rapid progress on strategies 1, 2, and 3 of A²ZERO, which are deploying energy efficiency and all-electric technologies, as well as supporting renewable energy adoption.

In addition to the above, the HEA Program must:

1. Provide outstanding customer service.
2. Provide accessible, intuitive, and well-designed materials.
3. Support diverse market areas (single family, 1 – 4 unit multifamily, larger multifamily, owner-occupied, tenant-occupied, landlords, low-to-moderate income households, market rate households).
4. Provide a seamless process for participants to access programs, including the Ann Arbor Community Climate Action Millage rebates and Home Energy Rating Disclosure Program.

3. Requirements

The following are requirements that any HEA Program Administrator will be expected to undertake:

- A. Program Planning.** The Administrator shall review outcomes and materials of the pilot program and all program goals and prepare a plan for operationalizing the HEA Program within 30 business days of contract award. Program planning must include, but is not limited to:

1. Background and Information Gathering. The Administrator shall complete the following tasks before preparing the program plan. These tasks must be informed by the lessons learned from the HEA Program pilot and from similar programs across the country. The Administrator may request additional information from OSI as necessary to complete the plan. Required tasks include:
 - a) Kick-off meeting with OSI staff;
 - b) Meeting with City staff representatives from relevant offices and programs to gather information relevant to design the HEA Program;
 - c) Reviewing materials from the HEA Program pilot, which include:
 - Summary Report of experience, findings, and lessons learned
 - Path to Zero Decarbonization Template
 - Energy Assessment Report
 - Operations Guide
 - d) Reviewing materials, experience, findings, and lessons learned from other communities that have operated similar programs, including Holland, MI.
 - e) Meeting with City staff representatives weekly to share status updates and collaboratively make program decisions.
2. Operational Timeline Development. The Administrator shall develop a detailed timeline for operationalizing the HEA Program, including key dates and deliverables, and a date certain for program launch.
3. Operations Plan. A detailed plan outlining the approach to completing tasks B and C below, inclusive of process steps, key dates, deliverables, expected outcomes of deliverables, input needed from OSI, key outreach and engagement components, and information on any software, sub-contractors, or third parties used to fulfill requirements. This also includes development of a flow chart indicating the various participant pathways to engage with the HEA Program.
4. Participant Eligibility and Verification Process. Creation of a process and decision pathways for ensuring and validating that individuals coming to the HEA Program are eligible participants, including verifying eligibility for certain City programs.
5. Draft Material Design. Draft mock-ups of key materials, including decarbonization plans and assessment reports, which must be approved by OSI before being formalized into the program.
6. Metrics Tracking Plan. A strategy, and ideally a platform designed, for tracking program performance, number of participants, and program impact, among other key data points. OSI will work with the selected Administrator to develop the key metrics necessary for program tracking, but the Administrator will be responsible for tracking these metrics.

B. Administration of the HEA Program. Once designed, the Administration will be

responsible for operating and maintaining the HEA Program. Key tasks under this action include:

1. Administration of the participant eligibility and verification process, including a process for verifying income-qualified residents, if required, for certain programs.
2. Creation and real-time maintenance of web-based resources that provide information on home decarbonization, program information, contact information, and metrics demonstrating program impact. The website may be hosted on the City's website or hosted by the Administrator but the City will work with the Administrator to make a final determination of where the website should reside and must review all content before it is posted on any public facing website.
3. Creation and administration of a Help Center to receive and respond to phone calls, emails, forms, chats, referrals, and/or other submitted inquiries regarding building decarbonization. This includes responding to all requests that come in and documenting relevant information to understand frequently asked questions and concerns.
4. Customized building decarbonization plan development explaining how to combine energy efficiency, electrification, renewable energy, and health and safety improvements to transition the resident's home to carbon neutrality. Customized plans should be actionable, and include incentives, rebates, income-qualified programs where appropriate, contractor information, and financing resources, as well as next steps to action.
5. Assessing individual buildings to gather key pieces of information on a building, its equipment, and its occupant's concerns to provide actionable information on decarbonizing. The assessment must:
 - a) Be compatible with the U.S. DOE Home Energy Score.
 - b) Be administered by a qualified professional.
 - c) Include a virtual assessment process, which should be the primary option for most participants.
 - d) Include an in-person assessment process to meet the needs of participants with limited access or familiarity with technology, limited mobility, or those otherwise requiring additional assistance.
 - e) Include reports with actionable information to the participant, and which are utilized to inform the customized building decarbonization plans discussed above.
6. Delivery of services in a timely manner, with responses to inquiries within 2 business days, and the ability to schedule meetings, building assessments, phone calls, and deliverables within a two-week timeframe from request, regardless of fluctuations in volume of program utilization. Budget should take

into account the need for flexibility in provision of services in both peak and non-peak times.

7. Creation and maintenance of an internal, online-accessible database and report template that includes, but is not limited to:
 - a) Address of participant.
 - b) Demographic information.
 - c) Type of assessment completed and copy of assessment.
 - d) Log of communication with participant and time to resolution.
 - e) A [“DTE: Customer Consent Release Form”](#) (see Attachment A) and/or third-party utility data link (optional), and accompanying data.
 - f) Other metrics the Administrator deems necessary to complete the objectives of this RFP.
8. Monthly meeting between the Administrator and the City’s representative to assess program status. Program status meetings may be more frequent if necessary.
9. Quarterly status reports, inclusive of successes and proposed HEA Program revisions. OSI may authorize changes to the HEA Program in alignment with the goals of the City and OSI, based on information shared in these status reports and monthly calls. This also includes biannual presentations to the City’s Energy Commission and annually presenting to Ann Arbor City Council on the efficacy and impact of the program.
10. Regular and real-time communications, as necessary or requested, on the status of the program and any issues or concerns that arise.
11. Routine administration of participant evaluations to understand the impact, effect, and opportunities for improving the HEA Program. These evaluations should be aggregated and shared with OSI staff during at least the quarterly status reports, or at more frequent intervals as requested.
12. The Administrator shall prepare an annual report, beginning 12 months after the launch of the HEA Program, summarizing the impact of the Program.

C. Additional services as needed.

1. The Administrator shall provide hourly bill rates, in addition to aggregate program costs for the tasks outlined above, for all key staff that may be needed to provide additional services as directed and approved by OSI, related to creation and administration of the HEA Program. If OSI identifies additional services are needed, a request will be made in writing to the Administrator from OSI and the Administrator will provide a quote for the work. OSI must give approval to proceed in writing before the Administrator begins work on any additional services or tasks.

The City reserves the right to reject any proposal that it determines to be unresponsive and deficient in any of the information requested for evaluation. A proposal with all the requested information does not guarantee the proposing firm to be a candidate for an interview. The committee may contact references to verify material submitted by the offerors.
2. The committee then will schedule interviews with the selected firms if necessary. The selected firms will be given the opportunity to discuss in more detail their qualifications, past experience, proposed work plan and fee proposal.

4. The firms interviewed will then be re-evaluated by the above criteria (A through D), and adjustments to scoring will be made as appropriate. After evaluation of the proposals, further negotiation with the selected firm may be pursued leading to the award of a contract by City Council, if suitable proposals are received.

The City reserves the right to waive the interview process and evaluate the offerors based on their proposals and fee schedules alone and open fee schedules before or prior to interviews.

The City will determine whether the final scope of the project to be negotiated will be entirely as described in this RFP, a portion of the scope, or a revised scope.

Work to be done under this contract is generally described through the detailed specifications and must be completed fully in accordance with the contract documents.
