RE: Draft Comprehensive Plan

What about WATER?

·Is there enough drinking water for the growth cited?

·Conversely, what about the enormous amount of water from recent rainstorms? Flooding is already a problem and will only be worse with more impermeable surfaces.

What about CITIZEN PARTICIPATION?

·Little to none.

What about FACT-BASED DATA?

·Little to none.

What about TIME?

·The draft plan was released on April 7th, just a little over a month ago.

·The plan is to compress the process of change into 18 months when similar plans have required up to 4 years.

What about the TREES?

·If structures are built with hardly any space around them, there will be increasingly fewer trees.

Do people want to live in a community of paved streets and sidewalks--without trees and other plants?

And where do the birds and animals live in that kind of barren wasteland?
