Subject: Pizza House Changes
Importance: High

Kirsten,

I'm really sorry to bother you again, but the customer was wondering if we could possibly add the three attach files to the docket, the first one is a picture of Luigi's pizza, I sent you this yesterday this is a much better shot for what it looks like at night. The second file is showing the pizza house looking north from the Blu Apartments, indicating no visibility for any pizza house signage. The last file is the looking south at the Blu building, showing the 10 foot wall.

I know this is entirely last-minute again and I will not ask you to change anything else, please see what you can do for me I would really appreciate it.

Thank you very very much
