Subject: Concern on A2 image!

Dear Planning Commission,

“Woodburry Gardens rezoning(REZ24-0008) and 1310 Wisteria Dr site plan(SP24-0013)”

We have received the notice regarding the proposed development. We must express serious concerns. This is a very narrow area, and constructing two 7-story buildings and a 5-story parking structure would severely affect the character of Ann Arbor. The height and density would disrupt the aesthetic, comfort, and existing visual harmony of Woodbury Gardens, which is known as a higher-end, attractive community.

Adding such intense density at a key traffic route near Stadium Boulevard would worsen congestion, safety, and overall livability. While development happens, population growth does not justify such a drastic shift here. We believe this will diminish the quality of life and the appeal of this neighborhood.

We urge you to reconsider and ensure the development aligns with Ann Arbor's charm and balanced growth.

Thank you For your consideration.

Residents @ woodbury Gardens
