Subject: Comprehensive Planning Feedback

Where can I give formal feedback about the plan, the process and the next steps.

I think this has been rushed without community input - though it has started now, but it so far down the path that it seems pre determined.

I am especially disturbed about the transparency re: data for the plan; the major assumptions stated clearly and the stated objective being affordability without subsidy...there will be no affordability without subsidy.

Is there a current survey I can fill out?

Thanks for responding
