SECTION I - GENERAL INFORMATION

A. OBJECTIVE

The City of Ann Arbor (City) is seeking the services of qualified firms (Contractor) to provide 9-1-1 Advanced Life Support (ALS) ambulance services as a coordinated service to the City of Ann Arbor Fire Department's (AAFD) current basic life support non-transport and transport Emergency Medical Services (EMS). The awarded Contractor, shall provide the requested services in accordance with the requirements specified in this RFP. All ambulance services described in this RFP document refer only to ground ambulance services. The City does not guarantee that the Contractor will be assigned any particular number of calls for service. However, the Contractor selected for this contract will be the single provider of ALS service to the City of Ann Arbor during the terms of the contract. Prior to submitting a proposal, Contractors are advised to carefully read this RFP in its entirety.

AAFD operates one basic life support ambulance (BLS). A second BLS ambulance is staffed for periods of peak demand such as during home University of Michigan football games or as non-overtime staffing allows. AAFD also operates five BLS non-transport fire apparatuses (engines and ladders). In 2024, AAFD responded to 5,557 emergency medical incidents.

As an EMS provider, AAFD serves a critical role in a coordinated system that ensures patients receive the appropriate level of care at every stage, from the moment a 9-1-1 call is made to the point of definitive treatment or recovery. This coordinated system, also known as the "continuum of care," encompasses every phase of patient interaction, including initial emergency response, prehospital care, transport, hospital admission, and post-discharge follow-up, ensuring that patients experience a consistent and high-quality care process throughout their journey.

AAFD's EMS delivery is a crucial link in this continuum of care by providing rapid response, patient assessment, on-scene treatment and/or stabilization, transport if necessary to an appropriate facility based on patient's needs, and follow-up for high-risk patients. The integration of these services into the broader healthcare system is essential for ensuring overall system efficiency and supporting the continuum of care.

As a contracted ALS ambulance provider for the City, the Contractor will be responsible for delivering timely, proficient, and compassionate service based on the following goals:

1. Optimal Patient Care – High-quality advanced prehospital medical care and interventions to ensure appropriate level of care and seamless transition from the prehospital environment to more definitive care settings, if needed.
2. Resource Utilization and Adaptability – Integration of resources into AAFD's EMS deployment model to ensure maximum effectiveness and system-wide efficiency.

3. System Adaptability – Capacity and flexibility for adapting to deployment changes necessary to meet system demand and maintain level of service.
4. Fiscal Responsibility - Fair and reasonable fee proposal that supports service level requirements and demonstrates value to the residents and visitors.

From October 2024 – September 2025 it is estimated there were 11,828 calls for ALS service in the City of Ann Arbor. Of these incidents, 4,936 were normal traffic (non-life threatening) responses and 6,892 were priority traffic (life-threatening). The effective date of the resulting contract will be January 1, 2027. The initial contract will be for two (2) years with the potential of a single two (2) year renewal.
