Subject: Zoning Variance for 245 and 255 Park Lake lots

Council member Nelson,

I received postcards regarding the architect's request for front setback variances on the lots at 245 and 255 Park Lake. I have reviewed the site plans and note that these two houses would be larger than all but one of the existing houses on Park Lake, and, with or without the proposed setback variance they would be by far the closest to Park Lake Avenue and to the First Sister Lake across the street. Although I would prefer smaller houses on these lots, I don't know that my personal preference is a reason to deny these requests.

Thank you

Pat Jessup
