Subject: Development vote April 17 Cottages at Barton Green

Hello,

I am writing expressing my concern for the approval of the new Northside development. With the North Sky development under way, the new lower town condo project already approved, this project I feel will stress commuter routes, hospital traffic and endanger school crossings. I am a resident off Cloverdale st and have 4 children, 2 of which attend A2 Steam Northside. I Currently bike to U of M hospital because the traffic and parking is such an issue. I feel the Broadway bridge / Maiden lane intersection is already stressed and needs infrastructure improvement, with the addition of North Sky and the Lower Town condos, this area will be a nightmare during commuter time. If this new development is added, without timely modifications, it will surely jam bus routes.

Please dont allow these developments with out proper infrastructure improvements that don't come at the cost of current residents.

Vincent O'Neill
Northside resident
