Subject: Platt Road Homes

To the planning commission

I have attended the meetings for the new construction on the East side of Platt road. There are several homes there now. but I am concerned about the impact of so many more homes in such an already dense neighborhood. It has got to impact the neighborhood in a negative manner in parking, in over crowding schools, in traffic congestion in environmental concerns (such as flood plains) to increase the size of a neighborhood in such a short period of time is not a good thing. the surrounding homes which are single family will loose their value and it will bring the whole neighborhood down.

Please reconsider and give the public more time to hear other points of view.
