Subject: Re: Resident Participation in Planning Matters

Hi Mr. Higgins,

Thanks for contacting me. I am contacting Wendy Rampson so that she can share your communication with the rest of the Planning Commission. She can also pass along your comments to the petitioner's representative Mr. Moore. Hopefully the postponement will allow for research and discussion of the points brought up in the meeting.

Take care,

Wendy Woods

Ms. Woods- I was impressed Tuesday night (July 21 Planning Committee Meeting) at the ability of several committee members to gradually hone-in on essentials of the 2250 Apartment Complex Proposal.

However, I am dissatisfied so far, with an inability to initiate discovery on a new approach to the Fire access dilemma.

All I would ask the Committee is-

direct the Petitioner to research a solution for both the people-dense Brookdale assisted living and the people-dense 2250 Apartment complex.....buy connecting the adjacent rear of each property with a Fire Lane.....thus providing both facilities with a second entry. (a north-south, not west connection)

The Developer would save money, the Fire Department satisfied, and the possibility of resident-approval significantly increased.

I am not asking you to judge this (or other issues), just looking for assurance that all Committee members take part in it's evaluation, and provide a considered response.

I would be pleased to meet/talk/communicate with you . (I am aware of the contents of the July 2015 handout)

most sincerely,

William Higgins 2131 Chaucer Drive 996-9203
