XII. REMEDIES

- A. This Agreement does not, and is not intended to, impair, divest, delegate or contravene any constitutional, statutory and/or other legal right, privilege, power, obligation, duty or immunity of the Parties.
- B. All rights and remedies provided in this Agreement are cumulative and not exclusive, and the exercise by either party of any right or remedy does not preclude the exercise of any other rights or remedies that may now or subsequently be available at law, in equity, by statute, in any agreement between the parties or otherwise.
- C. No waiver of any term, condition, or provision of this Agreement, whether by conduct or otherwise, in one or more instances, shall be deemed or construed as a continuing waiver of any term, condition, or provision of this Agreement. EXHIBIT A SCOPE OF SERVICES

The Contractor shall provide all items listed in the Scope of Work for RFP #978 and the Hubbell, Roth and Clark, Inc. Proposal to RFP #978.

RFP #978 – SCOPE OF WORK

The Contractor shall provide a comprehensive evaluation of all guardrail located within the City of Ann Arbor.

The evaluation will update a current inventory of all the guardrail runs in the City, in addition to a condition assessment of each element of the guardrail system for the development of a multi-year maintenance program. In addition to evaluating the condition of the individual components of a run, each run will be evaluated for the effective protection provided for potential removal or reconstruction.

This proposal will secure the services of a consultant for up to 3 years to perform an evaluation annually, prepare plans and specifications, and provide construction management services in accordance with the scope of work. A separate resolution will be presented to Council for approval for Task 2, once Task 1 has been completed and the scope of Task 2 is more firmly established.

Task 1: Evaluation, Reporting and Prioritization - COMPLETED

There are approximately 60 locations within the City with guardrail, as shown on the list provided in Appendix A. The consultant will visit each location and evaluate all of the components of each run. All components are to be reviewed against the current MDOT Road and Bridge Standard Plans and Special Details, Standard Specifications for Construction and Road Design Manual, and AASHTO Roadside Design Guide. All inspections shall include the following:

1. Rail
 - a. Length of type
 - b. Height and potential for adjustment per MDOT standards
 - c. Thrie transitions
 - d. Condition
 - e. Offset to face
2. Posts and blocks
 - a. Type

 - d. Presence of galvanized nails
 - e. Number of each type of post and block
3. Terminals
 - a. Current MDOT Standard Plan

 - ii. Note if posts deleted to span an object without being properly backed
 - b. Type
- 7. Curved rail
 - a. Installed per current MDOT Special Detail for guardrail at intersections
 - b. If rail at end of run, is departing terminal or approach terminal properly installed
- 8. Apparent protection inadequate

Prior to performing field work, the Consultant will work with City staff to develop a method to record the data and comments which will enable seamless integration of the information with the City's Cityworks and GIS databases for perpetual inspection and maintenance. The Consultant will provide both paper and electronic copies of the data.

The Consultant will then prepare a report with an overall evaluation of the condition of the guardrail and elements. The evaluation and initial report will be completed within 90 days of being given authorization to proceed. The report will contain costs to bring all elements to current standards, with preliminary costs to replace runs that are found to provide inadequate protection. Another report will be completed which will prioritize the repairs and replacements based on the liability they present to the City.

Task 2: Design and Implementation

The Consultant will then work with City staff to integrate the recommended repairs and replacements into the City's projected funding availability to develop a multi-year program for implementation. The Consultant and City will evaluate the opportunity to secure Federal Funding or Safety Grants to supplement the City's budget.

The Consultant will then design, prepare plans and specifications, and provide construction engineering for guardrail runs found to provide inadequate protection, as directed by the City. The extent of this scope will be negotiated between the City and the Consultant and will be dependent on the findings from Task 1 and the projected budget. Because of the undetermined volume of work associated with this project, the City intends to award a professional services agreement with up to two one-year extensions at the same terms in an effort to substantially complete the project. The Consultant will be responsible for the following:

- 1. Survey
 - a. The Consultant shall perform field surveys to collect sufficient accurate data to use in completing the design. The Consultant shall complete the survey of the entire project influence area, and shall at a minimum, provide the following items in their proposed scope of work:
 - Locate all trees 6" diameter or greater and provide the genus and cultivar (if applicable) breakdown

- Locate all cultural features within the requested survey boundaries
- Provide a survey with 1' contour intervals
- Certify ROW and locate property boundaries
- Locate all "breaklines" and other features necessary to develop accurate contours
- Locate all existing property irons and monuments within the survey limits
- Locate and determine horizontal and vertical elevation of existing public and private utilities
- Perform all survey work in accordance with the City of Ann Arbor Public Services Area's Standards and its Geodetic Control Manual
- Provide AutoCAD drawings and all field survey point data to the City

2. Plans and Specifications

- a. Prepare complete, detailed, and accurate construction plans and specifications meeting the requirements of the City of Ann Arbor in order to satisfactorily complete the project. All plan sheets shall be drawn and prepared in accordance with the City of Ann Arbor Public Services Area Drafting Standards.
- b. If any grant money is obtained, the Consultant will be expected to meet MDOT's Local Agency Programs Project Planning Guide schedule to secure any funding the City may receive. This will require meeting targeted dates and timelines for submittals. Otherwise, plans and specifications shall be completed by April 1 of each year in an effort to capture competitive bid prices.
- c. MDOT Guardrail Worksheets must be prepared and submitted for all proposed designs.
- d. Coordinate with other City service areas, local agencies, private utility companies, and members of the public. Any private utility relocations necessary will be coordinated by the Consultant.
- e. Preparation of construction plans and specifications shall include preliminary reports, identification of alternatives, cost estimates, and contract documents. The specifications shall include all current MDOT standard plans and specifications, special details, and any and all frequently used special provisions.
- f. Coordinate, facilitate and/or attend project-related meetings, such as design review, pre-bid, and pre-construction meetings will be required.
- g. The consultant shall also secure all necessary permits from all approving agencies including but not limited to the Michigan Department of Transportation.

3. Construction Administration

- a. Perform construction staking for guardrail replacement or repair projects as needed.
- b. Construction engineering, including, but not limited to, review and approval of cut sheets, resolution of field conflicts, review of pay estimates, etc.
- c. Construction Administration shall include construction engineering/ management services required to coordinate and document activities such as construction staking, continuous monitoring of projects, coordination and supervision of testing services, attendance at meetings, full time inspection, periodic reporting of progress, preparation of progress payments, review and recommendation of claims, preparation of change orders and preparation of final payment.
