**Subject:** Rush to implement

I am very disappointed with the lack of leadership by Ann Arbor city officials. Assurances, while the CLUP was being developed, that there would be significant input from residents over a period of time, appears no longer to be the case. There is a rush to implement.

Our Federal government has created a blueprint for implementing top-down edicts, paying no attention to input from anyone. Now it is happening in Ann Arbor. Maybe this is the new reality.

How disappointing.
