Subject: Proposed adjacent Washtenaw Avenue re-zoning

As a resident, I am writing to strongly object to re-zoning of parcels on Washtenaw Avenue adjacent to the Woodcreek subdivision and adjoining South Pond area. Traffic congestion and tie-ups are already significant and further hi-density development would create a clearly negative impact on residents and traffic flow patterns. The current residential zoning was previously approved by council and should remain so – the proposed changes to our area would create significant adversity. Beside this, redevelopment along Platt Road, feeding in to Washtenaw, will further congest this traffic corridor. Please do not do this to our lovely and pleasant residential area.
