Subject: 2550 Packard Zoning Variance

Dear Zoning Board of Appeals,

We object to the granting of a sign variance to the Packard Square developer at 2550 Packard.

This development has been a problem in our neighborhood for more than eight years. The current building project looks nothing like the plans that were presented to the neighborhood and first approved by the city. The buildings are very close to Packard, looming over the street and the sidewalk, not set back as originally designed.

The proposal to put a 10 foot high sign only 2 feet from the property line would make this development even more unsightly. Such a sign would distract drivers and block sight lines for turns. This is a residential area, not a commercial strip.
