Subject: 2250 Ann Arbor-Saline Condo Development

Good afternoon,

I am very concerned about the proposed access route that this condo development may create from Ann Arbor-Saline to Scio Church. I live in the Lansdowne neighborhood and am troubled about the extra traffic this type of cut thru would create. Since we have many kids in our established neighborhood, I do not think that a new development should create such a cut thru that would more than likely compromise the safety of our community members, especially small children. Many children walk to Lawton Elementary every morning when school is in session, a time when many commuters are also headed into work. In addition, Lawton Elementary serves as the only bus stop for all of the kids headed to Slauson Middle school, so there is quite a bit of foot traffic happening all morning and afternoon. In addition, both Lansdowne Park and Lawton Elementary have sports practices or games many evenings during the fall, spring and summer seasons. Further, many members of our community can be seen thru out the year walking around or riding their bikes. To ensure that Lansdowne remains both a safe and tranquil neighborhood, I urge you to have the developer remove any paved connections that allows cars to access Scio Church from Ann Arbor-Saline thru the Lansdowne.

Thank you.
