AIRSPACE CASE NUMBER: 15-AGL-64NR

TO ALL INTERESTED PARTIES

PROPOSAL: The Federal Aviation Administration has been advised by Joel Cavazos, General Engineer, Tech Ops Requirements, of his request to decommission the Detroit Non-Directional Beacon (NDB) Runway 15 (DET) at the Coleman A. Young Municipal Airport in Detroit, Michigan. The Depot no longer maintains an inventory of replacement parts for the equipment. The technician must search for parts from previously decommissioned facilities in hope of finding a compatible part that is in working order. Should the study show that the decommissioning of the DET NDB would not be detrimental to the National Airspace System, the device will be removed without replacement.

PROPONENT: Joel Cavazos
General Engineer, Tech Ops Requirements
10101 Hillwood Parkway
Fort Worth, TX 76177

LOCATION: The physical component is located:

Latitude: 42° 29' 40.92"
Longitude: -080° 31' 52.9926"

This circularization is intended to provide the public with the opportunity to review and comment to the effect this proposal may have on aeronautical activity. The issuance of this non-rule circular is to give notice of impending action within the NAS.
