Subject: Condo development at 2250 Ann Arbor- Saline Rd

Our neighborhood had dinner together last Saturday. Some one asked what had been done through the meetings on the flooding in our neighborhood since all had witnessed similar flooding on a Sunday afternoon several weeks ago. After having attended all but 2 of these meetings, my answer was "little to nothing" along with a synopsis of the concluding results. We then talked about these condos wondering what anyone had heard.

After hearing today that the Condo Project is indeed moving forward and that the road through to Asot and Chaucer is still in the plan, I do NOT believe this Emergency Exit road thought. That exit into our neighborhood will be used as an easy cut through to Scio Church Rd. all the time, sending cars out to the signal light on 7th St. and coming back through there on the way in. Your plan and words fool no one. Secondly, whose responsibility will it be to assure the Lansdowne home owners will not be inundated with water from the added source when the problems we already have are not being addressed as yet? This is not an idea that will be an asset to Lansdowne or Churchill Downes and our remaining water problems. We ask that you reject this proposal.

Betty and Paul Shelburne
2135 Blaney Dr in Churchill Downes
