Subject: My departure from GAC . . .

Hi friends,

I've been meaning to follow up for some time as it has slowly dawned on me over the past couple of weeks how little time remains for me with GAC. I thought I had through the end of the year but have ended up giving notice to U-M early, and my last day will be in mid-November. My family and I will begin our leave soon after that and expect to be away for at least 6-8 months. As much as I've loved my time on the Greenbelt, I think it would be irresponsible to miss that many meetings, especially as GAC finalizes a new strategic plan.

Remy, can we go ahead and get the at-large position posted?

And if it helps at all, we had two strong runner-ups for one of the biology representative positions. I don't think there is anything that would preclude bringing on someone with a naturalist/biologist background. I've attached here a summary of their qualifications, which we produced when we were reviewing the position that went to Sheila. Once we've posted the position, and with your collective agreement, I might inform them that the position has opened.

Thanks!
John
