Subject: South Main Dorm - NO TREES!

This message was sent from outside of the City of Ann Arbor. Please do not click links, open attachments, or follow directions unless you recognize the source of this email and know the content is safe.

So now in addition to tearing down two houses - one very attractive early 1900s - we will not have trees! Excuse me? Ann Arbor Tree City?

This is such a bad idea that the entrance to Ann Arbor will have an ugly 35 bedroom building, with very little parking, and no trees.

Please do not approve the building at 907 & 913 South Main Street. What we need is more affordable housing and attractive landscaping, Do not approve a variance for planting street trees, The more trees the merrier and healthier,

Thank you,

Edith M, Bletcher
