Hello, planning folks! Just a quick note to respectfully ask that you stay focused on your work and not be swayed by council's interference in the CLUP process. You've done an outstanding job leveraging your knowledge and expertise to create a solid and equitable plan, despite the noise from those with ulterior motives. I hope you will politely decline the suggestions of six more of those voices. You serve the people of Ann Arbor first, and council second, so please stand strong for what's right, and continue your great work. Thanks!
