Subject: Against Comprehensive Plan Land Use

Dear Commision:

I am writing to voice my strong objection to both the plan and the underhanded way that the city is attempting to implement it. I see this as a blatant attempt by developers to take over government for their monetary gain; much as we see occurring in our federal government at present. I am totally against turning our city into avenues of high rises, built out to the street with no regard for family neighborhoods, trees, parking needs, or quality of life. This does not even begin to list the unanswered and avoided questions of infrastructure and cutouts that you are so obviously avoiding in this headlong jump into the greed and avarice of the wealthy builders.

Drop this plan and begin again with true citizen input.
