Dear members of the Planning Commission:

Thank you for taking the time to hear public input regarding the 330 Detroit St development project. I am a vendor at the Ann Arbor Farmers Market, and am unable to attend the meeting in person. However, I ask that you try to minimize the impact of construction on Detroit St, considering the high traffic near the market and neighboring businesses (Detroit St Filling Station). Perhaps staging could be done on 5th instead of Detroit, to maintain parking and loading/unloading activities. I am greatly concerned about the impact this project will have on our farmers market, and my business and customers. I hope that you and management will be able to find ways to allow our market to continue to operate during construction in a way that does not have a large negative impact.

Thank you for your consideration.

Sincerely,

Stephanie Willette
