Subject: Pause the Plan

I recently became aware that land rezoning is moving through our city even though the majority of land owners reject it. There seems to be a big disconnect between political figures in Ann Arbor and the tax paying, voting residents. I would like to know how I can improve our communication? Is there a newsletter that the city shares that condenses what they are doing legitimately, or illegally? Is there an email list I can get on to get an update on Pause the Plan from the city?

I will be supporting Yousef Rabhi for Mayor in any way I can. He really gets the residents needs, is a great communicator, and an amazing leader which is so important for ALL of our residents.

Does the City take into account the amount of pollution that will be generated from all the ceramic tile & marble installations, paints and varnishes that go down our drain into our water that we drink and bathe in? The City has A2Zero rebates to control gas but does nothing to diminish the amount of chemicals from building destruction, demolition, and all the chemicals that go into erecting these massive new buildings, not including the land that is destroyed in the process or the chemicals released into the air from the demolition. It's always harder to do the right thing. Let your conscience be your guide. Seriously-wake up or be replaced.
