Subject: Speed compliance transportation report link

Hi Commissioners,

Here's the City transportation report I mentioned during our working session tonight (9/13/2022) on the speed compliance on Main Street after the buffered bike lane adjustment.

"Speeds have decreased significantly along the corridor. Data was collected on 6/3/21 (pre-construction of reconfiguration) and again on 10/14/21 (post- construction of reconfiguration) as shown in the tables below. The percentage of vehicles going the posted speed limit dramatically increased as shown in the orange highlighted cells – northbound speed compliance increased from 29.6% to 65.5%; southbound speed compliance increased from 50.2% to 83.3%. Additionally, the number of vehicles going 10mph or over the posted speed limit dropped significantly from 349 to 55 as shown in the yellow highlighted cells."
