Subject: Clean Renewable Energy

Dear City Council and Mayor,

If we don't have a viable planet to live on, what do we have? I strongly feel that I could never vote for someone who doesn't support clean renewable energy for our city. Myself and many of my friends will be watching how you vote.

Thank you,

Karen Watanabe

Subject: Dead deer in Leslie Park this week

I didn't want it lost that there was a dead deer found in Leslie Park just about at this same time two years ago. Only we had sharpshooters around when that happened. HSVS had no problem getting there immediately (along with the press) and start autopsying the deer to find that telltale bullet hole.

Could it be possible that the original deer died of old age or whatever this current deer died from?

How was it that HSVS could not come and collect this new deer-- no PR in it?
Was there ever any proof found that the deer was killed with a bullet from APHIS?
Was the original deer ever checked for CWD or any other bovine disease?

I know I'm venting a little, but maybe there is something not that healthy for deer in Leslie Park. I'm not sure I ever heard about the final outcome of what was determined caused the death of the first deer. If it wasn't a gunshot, the news certainly never cleared up the "mystery".

Subject: How did the 1140 Broadway

How did the 1140 Broadway vote go tonight? I just got home from my concert.
Thanks!
