Subject: Re: Sewer service along Riverview Drive?

Dear Ms. Gosselin,

My wife and I write in support of Mr. Allen's email on Monday, December 12 (yesterday). We live on Riverview Drive and our septic system is functioning but marginal. We are at risk of septic system failure and would support the earliest possible installation of a City sewer system on our street. We hope that your understanding of the risk of septic system failure in this neighborhood will influence the decision regarding the timing of the Riverview Drive sewer project.

Our earlier discussions with Liz Rolla left us with the understanding that in any proposed infrastructure project on Riverview, city water utility would be installed along with sanitary sewer. Can you confirm this?

Thank you,

Dan Barry and Kay Wilson

614 Riverview Drive

Ann Arbor, MI 48104
