I just want to voice my opposition, as a property owner near the proposed location, that the City is considering allowing a marijuana dispensary to be located at the site of the Child Care Center, Broadway Gift Store, and many years ago the Northside Church. With all the new proposed building and housing for this area I find it confusing that the City would consider such a request. The north side, or Lower Town Ann Arbor is just starting to rebound and considering allowing such a business in the area will not help with this positive direction.

New planning and developments in this area seem to be upscale. Why would you allow a dispensary to open here?

Please consider the area, neighborhood, and the building itself, as it should be celebrated as a historical building, not a dispensary.
