Subject: Re: Natural Gas Ban

To the Planning Commission,

I am writing to express my support for the banning of natural gas installation in new construction and major renovations within the City of Ann Arbor, which I understand is currently under consideration. As a graduate of the University of Michigan's School for Environment and Sustainability, I have been trained to study the Earth's climate system. As a climate scientist, I know the reality of a warming and drying planet, the intensification of the hydrological cycle, and harmful particulate matter in our air are all connected to the burning of fossil fuels. We must drive down demand for fossil fuel combustion in multiple ways, starting with zoning.

Regards,
