

INTIMIDATOR™ 21XP

The Intimidator 21XP is the **ultimate hand-fed chipper**. With a 21" diameter chipping capacity, it equips tree care professionals with the tools to tackle even the biggest takedowns and clearing jobs that other companies can't handle. The Intimidator 21XP combines big horsepower with an **unstoppable feed system** and a chipping capacity approaching two feet in diameter, yet it's still **easy to maneuver** through suburban neighborhoods for jobs large and small.

UNMATCHED PRODUCTIVITY

The Intimidator 21XP easily processes large diameter trees with its large 26.25" high x 24.50" wide chipper throat opening. Featuring Bandit's proven slide box feed system driven with high displacement hydraulic motors along with a chain drive for the top feed wheel, large limby material is no match for this chipper!

EASY TO SERVICE & PEACE OF MIND

As with all Bandit products electronic components are minimized as much as possible to reduce troubleshooting and downtime. All major maintenance areas are easily accessed so routine maintenance is done easier and quicker. Bandit builds all components to be heavy-duty and reliable, which is why a 5-year "GUTS" warranty is standard on all hand-fed chippers covering the Bandit manufactured components of the drum and feed system

USER-FRIENDLY FEATURES & OPTIONS

A 270 degree hydraulic swivel discharge is standard on the 21XP allowing the discharge to easily be turned making it easier to pack chip trucks to max capacity. A radio remote control with tether back-up is available as an option allowing the operator to control the chippers feed system and discharge functions from a remote location.

TRACK OR LOADER OPTION

A rubber or steel track undercarriage can be added to the 21XP allowing you to take the chipper to the trees! Great solution for lot and land clearing projects along with right-of-way maintenance jobs. All track and chipper functions are controlled with a radio remote control. To further assist feeding the chipper a Bandit or Kesla style loader can be added to the 21XP. Either loader can be controlled by a swing out operator's console or radio remote control.

COMMITTED TO QUALITY & SERVICE

The Bandit Backbone™ Support

The Bandit Backbone is Bandit's commitment to customer service and support. It's always been a cornerstone of Bandit's philosophy, and today that backbone is stronger than ever. If you own a Bandit hand-fed chipper – regardless the age, hours, or warranty status – the Bandit Backbone is here to support you.

We Are Here to Support You

There are nearly 200 dealer locations in the US and 61 international dealers to support you. They are factory trained. Plus we have an experienced parts and service department supporting you and our dealers.

OPTIONAL KESLA LOADER

INTIMIDATOR™ 21XP FEATURES

- **Rope/Line Shear Device (standard)**
Provides an improved chance that rope or lines inadvertently entering the chipper may be cut
- **Last Chance Cables (standard)**
Stops/reverses the feed wheel when pulled in case of an emergency
- **Operator Safety Control Bar (standard)**
Wraps around 3 sides of the infeed chute & controls the direction of feed wheels
- **Wood Pusher Paddle (standard)**
Used to feed small wood debris into the chipper
- **Chipper Hood Pin w/Padlock (standard)**
Prevents unauthorized access to the disc or drum
- **Chipper Hood Engine Disable Plug (standard)**
Prevents engine from being started without the hood pin in place
- **Hydraulic Bottom Bump Bar (option)**
Stops feed wheels via mechanical connection when bumped, diverting hydraulic power away from the feed wheels
