Subject: 1140 Broadway

To the City of Ann Arbor Planning Commission:

We, the undersigned, wish to register our dissatisfaction with the site plan proposed by Morningside Development called "1140 Broadway" and its request for a zoning change.

We request that any zoning change respect the city's Master Plan. The C1AR zoning that is requested is worrisome, as it has so few restrictions, inappropriately designates the area as "campus", and sets a precedent for surrounding properties. Any zoning change should reflect the Master Plan and the location of this development as a buffer between the Medical Center and a less dense residential area.

In particular, we object to the height, massiveness and placement of Building A which will totally overwhelm the small homes to the north of Traver Creek. The Master Plan states that "The height of new residential buildings near Traver Creek should not exceed 4 stories in height." Yet Building A, as proposed, is 80 feet tall, well over 7 stories. Moreover, Building A is the most massive of the 3 proposed buildings, with 286 units and a 7-story parking garage with over 400 spaces.

The Master Plan also calls for protecting and restoring the creek, with public pedestrian paths to connect the neighboring park with the river. As planned, this would be impossible, since Building A is too close to the creek, endangering the health of the creek as well as limiting public use and enjoyment of it.

In addition, the Master Plan recommends that "most new buildings in the remaining portion...should be between 3 and 5 stories in height" and that taller buildings (as tall as 8 stories) be slender instead of massive. This recommendation, too, is completely ignored, with Building B 6 stories and Building C mostly 7 stories.

The Master Plan also calls for a mixed-use development as well as open space in the plan. Morningside's proposal has minimal retail (4,400 square feet) and very little open space except for the required streets and sidewalks.

We are concerned that Morningside's proposal will add over 600 units on 6.4 acres, a density that is way out of proportion to the surrounding neighborhoods. The residential apartment area between Broadway and the river (including Island Drive Apartments, Medical Center Court, Riverhouse condos and Nielsen Court) is significantly less dense, with 739 units on approximately 35 acres. The Broadway area is mostly single-family and small duplexes, with unusually large lots. This project will mean a huge increase in population and traffic.

The proposed development, with potentially 600-1200 new residents being added to an area already underserved by local retail, would sorely need the retail that should have been included in the proposed plan, were it following the Master Plan.

We welcome development on this site, but would expect closer adherence to the Master Plan, more reasonable density, respect for the natural features on and adjacent to the site, and set-backs, massing, and height that respect the surrounding area. We encourage the developer to submit a new plan that addresses the above concerns, and includes more open space and more retail space.

Sincerely,

Tom Stulberg, 1202 Traver 48105,
