Subject: Traffic to consider for Tuesday's Vote on Barton Cottages Development

Dear Planning Commission:

I ask that you consider the traffic burden placed on neighborhood roads when voting on the student housing development Barton Cottages tomorrow. Already without any additional development yet filled there is an incredible amount of speeding, honking, traffic jams during rush hour, and I've observed accidents at the Barton and Pontiac Trail intersection. The traffic burden at that intersection, the Barton and Plymouth intersection, the stop sign four way just before that on Barton is very high already. And consider how close these intersections all are to a K-8 school.

Students being so far from campus, and priced what they will be, and with such a large amount of parking will all bring their own cars. This will add considerably to the traffic and pollution in our neighborhood.

I took the attached photos at 4:55pm on Monday April 30 for you to consider. They are before full rush hour had even hit our neighborhood.

Barton Dr
Chandler Rd

STOP
