May 16 survey

Well, it's happened again. I signed up for notifications regarding the Land Use Comprehensive Plan, and certainly did not receive the information about the survey or the deadline for when it was due. I was only made aware of it by my neighbor at 11:30 this morning, and try as I might, I could not get it finished and submitted in time. It's frustrating, to say the least, because I will probably read later about how a "majority of Ann Arbor residents" said this or that, when in fact a majority of us didn't even get to respond to the questions or come to a meeting or jump in on a zoom.

And by the way, I don't like almost any parts of this plan.
Send me a survey and I can tell you why.
