Facility Information

Additional Instructions for completing this portion of the application are provided in the Appendix.

[Appendix to the Permit Application](#)

FACILITY DESIGNATED NAME (pre-populated)

Broadway 1200 Apts Pool-Ann Arbor

Facility Name 1 - Company Name

Morningside Broadway, LLC

Facility Name 2 - Division Name

NONE PROVIDED

Facility Name 3 - Plant Name

NONE PROVIDED

Public primary school systems and governing entities that cross local government boundaries should select "Local Government/District" below.

Which of the following best describes this facility?

Private

Facility Location

42.29070000000000,-83.73580000000000

1200 Broadway St., Ann Arbor, MI

Site/Facility Location Address

1200 Broadway St.
Ann Arbor, MI 48105

NAICS (North American Industry Classification System) code:

531110

CORRECTION REQUEST (APPROVED)

NAICS Code Needed

Please enter a valid NAICS code for this facility. The NAICS Code that most closely matches the SIC Code provided (SIC: 6513; Operators of Apartment Buildings) is NAICS: 531110- Lessors of Residential Buildings and Dwellings.
Created on 9/30/2025 10:10 AM by **Anne Wisner**

SIC (Standard Industrial Classification) code:

6513

Is this facility a primary industry? Refer to Table 1 of the Appendix to make this determination.

No, this facility is not a primary industry.

[CLICK HERE to view the Appendix to the permit application](#)

Enter the name of the Local Unit of Government (LUG) in which the facility is located:

Ann Arbor

Provide an e-mail address for an appropriate LUG contact, such as a clerk, who can be notified about the public notice period:

cityclerk@a2gov.org

CORRECTION REQUEST (APPROVED)

LUG Contact

Please confirm the LUG email address, which is typically the clerk for the municipality in which the facility resides. In this case, the appropriate contact is the City Clerk for the City of Ann Arbor. Please enter use this email: cityclerk@a2gov.org.
Created on 9/30/2025 10:13 AM by **Anne Wisner**

Does the facility have an EGLE-certified operator at the appropriate level?

YES

Contacts (1 of 2)

Additional Instructions for completing this portion of the application are provided in the Appendix.

Antidegradation

RULE 98 ANTIDEGRADATION REQUIREMENTS

In accordance with R 323.1098 of the Michigan Water Quality Standards, the applicant is required to submit an Antidegradation Demonstration for any new or increased loading of pollutants to the surface waters of the state, unless one or more exemptions apply. An Antidegradation Demonstration must contain the information specified in Rule 1098, outlined in the Appendix.

[Appendix to the Permit Application](#)

This part of the application enables the Department to determine whether you are seeking authorization for a change to your current NPDES permit that represents a new or increased loading of pollutants to the surface waters of the state. Select any/all that apply or select "None."

E) None: I am not seeking any such changes to my current permit

Additional Information

Other Environmental Permits

Provide the information requested in the table for any other federal, state, or local environmental permits in effect or applied for at the time of submittal of this Application, including, but not limited to, permits issued under any of the following programs: Air Pollution Control, Hazardous Waste Management, Wetlands Protection, Soil Erosion and Sedimentation Control, and other NPDES permits.

WATER FLOW DIAGRAM

[Beekman on Broadway Pool Flow Diagram.docx - 10/02/2025 11:31 AM](#)

Comment

NONE PROVIDED

CORRECTION REQUEST (APPROVED)

Water Flow Diagram

Please submit a water flow diagram showing wastewater flow through the pool facility from intake to discharge. The diagram shall include all operations contributing wastewater, including process and production areas, sanitary flows, cooling water, and storm water runoff. This water flow diagram should match what is provided in the Pool Narrative. Created on 9/30/2025 10:15 AM by **Anne Wisner**

1 COMMENT

Anne Wisner (wisnera1@michigan.gov) (10/1/2025 1:20 PM)

This application still needs to submit a water flow diagram which shows the processes that the water flow goes through from source to discharge. I have sent an example to the application contact on file. Please reach out with any other questions.

❖ **Surface waters of the state** ❖ means all the following: The Great Lakes and their connecting waters, all inland lakes, rivers, streams, impoundments, open drains, wetlands, and other surface bodies of water within the confines of the state but does not include drainage ways and ponds used solely for wastewater conveyance, treatment, or control. A storm sewer is not a surface water of the state.

NARRATIVE

[water flow.pdf - 09/30/2024 04:08 PM](#)

[Beekman Pool Narrative.docx - 10/02/2025 11:34 AM](#)

Comment

Commerical swimming pool waste water. Backwash fills holding tank, let rest for 10 minutes, perform visual test of water and record on bench sheet, perform grab sample and test Chlorine and PH levels. If chlorine level is below a detection level of 0.4mg/l and PH level below 9.0 SU, proceed with backwash. If either above stated level, treat pool and holding tank with appropriate additive. Repeat procedure after six hours. Back wash is stored in a holding tank, then transferred to a second holding tank prior to being discharged North to Traver Creek at the North property line

CORRECTION REQUEST (APPROVED)

Narrative

Please revise the narrative that describes the water flow diagram. Include the total volume of the pool, the flow volume used and upload it in a word or pdf document.

Created on 9/30/2025 10:16 AM by **Anne Wisner**

1 COMMENT

Anne Wisner (wisnera1@michigan.gov) (10/1/2025 1:21 PM)

Please take the info provided in the comment section of the narrative question and upload it as a word or pdf file.

MAP OF FACILITY AND DISCHARGE LOCATION

[water flow.pdf - 09/30/2024 04:09 PM](#)

Comment

Swimming pool waste water from monitoring point 001A through Outfall 001. Outfall 001 discharges to Traver Creek Tributary to the Huron River at Latitude 42/28900, Longitude -83.73150.

Laboratory Services (1 of 1)

Analyses Performed

water test using taylor complete k-2005 test kit

Water Source and Discharge Type

1. WATER SUPPLY INFORMATION

Identify all water sources entering the facility and treatment systems, and provide average flows. The volume may be estimated from water supply meter readings, pump capacities, etc. Provide the name of the source where appropriate (e.g., Grand River, Lake Michigan, City of Millpond, etc.).

Water Supply Type	Name and Location of Source	Average Volume or Flow Rate	Units
Municipal Supply	City of Ann Arbor	26	Other: gpd

2. WATER DISCHARGE INFORMATION

Select all wastewater types discharged from this facility.

Public Swimming Pool Wastewater

Identify water discharged by the facility and treatment systems, and provide average flows. If water is first used for one purpose and then is subsequently used for another purpose, indicate the type and amount of the last use. For example, if the water is initially used for noncontact cooling water and then for process water, indicate the amount of process water. The amount of water from sources should approximate the amount of water usage. If the amounts are different, provide an explanation.

Discharge Type	Average Flow Rate	Units
Public Swimming Pool Wastewater	.000025	Other: mgd

Briefly explain why the combined water from all sources does not equal the total approximate water usage, if applicable.

n/a

CORRECTION REQUEST (APPROVED)

Source to Discharge Explanation

Please provide an explanation as to why the average daily flow from the water source does not match the average monthly discharge flow or adjust the answers to match.
Created on 9/30/2025 10:25 AM by **Anne Wisner**

Note: For the above tables indicate units as MGD (million gallons per day), MGY (million gallons per year), or other appropriate units.

◆ 3. PRELIMINARY COOLING WATER QUESTIONS

Does the facility use water for cooling purposes?

NO

◆ 4. WHOLE EFFLUENT TOXICITY (WET) TESTS.

Have any acute or chronic WET tests been conducted on any discharge(s) or receiving water(s) in relation to this facility's discharge within the last three (3) years? This includes WET tests conducted for water treatment additive approval.

NO

PUBLIC SWIMMING POOL WASTEWATER QUESTIONS

Does your facility discharge filter backwash water?

YES

What type of filter produces this backwash?

Sand filter

CORRECTION REQUEST (APPROVED)

Filter Type

Please correctly identify the type of filter used by this facility. It is indicated in the question below that this facility uses a sand filter which produces backwash.

Created on 9/30/2025 10:27 AM by **Anne Wisner**

Describe how the first 30 seconds of backwash from a sand filter is handled (e.g., sent to a holding tank, discharged to sanitary, etc.). If a sand filter is not used, enter NA.

sent to a holding tank

Describe how the backwash from a diatomaceous earth filter is handled. If a diatomaceous earth filter is not used, enter NA.

n/a

Within the next 5 years, does the facility plan to drain this pool fully and/or draw it down significantly?

NO

Outfall Information and Effluent Characteristics (1 of 1)

Outfall:001 Receiving water:Traver Creek

Existing outfalls can be selected in the top-right corner of the page.

?To add additional outfalls (new or existing), please use the ◆Add New◆ button at the bottom of this page, or select ◆Duplicate◆ to copy the contact information and edit a portion of the contact fields.

1. OUTFALL INFORMATION

Enter the outfall number (e.g., 001):

001

Outfall Description

NONE PROVIDED

Enter the name of the receiving water:

Traver Creek

CORRECTION REQUEST (APPROVED)

Receiving Water

Please change the name of the receiving water to "Traver Creek".
Created on 9/30/2025 10:27 AM by **Anne Wisner**

Outfall

42.290333362723665,-83.73437532806396

CORRECTION REQUEST (APPROVED)

Outfall Latitude and Longitude Coordinates

Based on the site maps provided, the latitude and longitude for the outfall location appear to be located at approximately 42.290625 and -83.735342. Please revise these coordinates accordingly. This location matches the outfall location of the discharge into Traver Creek.
Created on 9/30/2025 10:29 AM by **Anne Wisner**

2. TYPE OF WASTEWATER DISCHARGED THROUGH THIS OUTFALL

Type(s) of Wastewater Discharged (check all that apply to this outfall):

Public Swimming Pool Wastewater

3. FLOW

?DEFINITIONS: A facility is considered to have a SEASONAL discharge if wastewater is treated AND STORED throughout a portion of the year and then discharged over a specified period or periods of days, weeks, or months. Batch process discharges are not seasonal discharges. Any facility that does not discharge seasonally is considered to have a CONTINUOUS discharge. Batch discharges are a type of continuous discharge.

Is the discharge continuous or seasonal?

Continuous

CORRECTION REQUEST (APPROVED)

Continuous Discharge

Please change the discharge characterization from "seasonal" to "continuous," as it is more appropriate for this facility's activity. During operation, wastewater is continuously discharged, not stored and then discharged later during a specific month, like a seasonal wastewater stabilization lagoon. Facilities with a seasonal discharge are restricted in when they are allowed to discharge. Upon revising to continuous there will be a few subsequent questions to answer on the application.
Created on 9/30/2025 10:31 AM by **Anne Wisner**

What maximum daily flow rate are you requesting authorization to discharge from this outfall during the next five years? Enter a numeric value only based on the units Million Gallons Per Day. If the requested flow rate is less than 1,000 gallons per day, please enter a minimum of "0.001".

.001

How often is there a discharge from this outfall (on average)?

Hours per day:	Days per year:
1	25

Does this outfall have batch discharges?

NO

4. PROCESS STREAMS CONTRIBUTING TO OUTFALL DISCHARGE

The information requested below is used to determine the applicable federal regulations for this facility. For each industrial process at the facility, provide the name, the SIC or the NAICS code, and a brief description of the process. As part of each description, identify a reasonable measure of the facility's actual long-term daily production and average number of production days per year. In many cases, this is the average daily or average annual production rate from the last five years. Some federal regulations require that certain industries report different information, depending on the type of process. The Summary of Information to Be Reported by Industry Type, pages 10-11 of the Appendix, includes an abbreviated list of industrial categories and their specific Application requirements. If the industrial process does not have specific Application requirements and recent long-term production rates are not an appropriate measure of future production, report the expected annual production rate for the next five (5) years, or for the life of the permit.

[Appendix to the Permit Application](#)

PROCESS STREAMS CONTRIBUTING TO OUTFALL DISCHARGE

Name of the process contributing to the discharge	SIC or NAICS code:	Describe the process and provide measures of production:
pool discharge from sand filter	531110	We measure chlorine and ph levels utilizing a taylor complete k2005 test kit with a grab sample

CORRECTION REQUEST (APPROVED)

Process Streams Contributing to Discharge

For each industrial process at the facility, provide the name, the SIC or the NAICS code, and a brief description of the process that is generating the wastewater being sought for coverage to discharge to a surface water under this application.

For this facility, the process contributing to the outfall discharge is the pool.

Created on 9/30/2025 10:33 AM by **Anne Wisner**

5. EFFLUENT CHARACTERISTICS - CONVENTIONAL POLLUTANTS

FOR ALL APPLICANTS, SAMPLE RESULTS ARE REQUIRED FOR: Biochemical Oxygen Demand – five day (BOD5), Chemical Oxygen Demand (COD), Total Organic Carbon (TOC), Ammonia Nitrogen (as N), Total Suspended Solids, Temperature-Summer, and Temperature-Winter, UNLESS you request a waiver and provide sufficient rationale to support that request.

Please fill out the table below, indicating how you have, or will be, providing the required analytical results. In the "How are results provided?" column, select "DMR" if you submit Discharge Monitoring Reports (DMRs) for that parameter, select "LAB REPORT" if you've attached a lab report for that parameter, or select "NONE" if you do not submit DMRs and have not attached a lab report for that parameter.

[CLICK HERE to open the Appendix to the Permit Application](#)

Please confirm that you have read the statements above.

I CONFIRM

Effluent Characteristics - Conventional Pollutants

Conventional Pollutants	HOW ARE RESULTS PROVIDED?	Waiver Information	Provide Rationale Here to Support Waiver Request
Biochemical Oxygen Demand - five day (BOD5)	NONE	I request a waiver for this parameter based on the following rationale:	effluent not expected in discharge
Chemical Oxygen Demand (COD)	NONE	I request a waiver for this parameter based on the following rationale:	effluent not expected in discharge

Conventional Pollutants	HOW ARE RESULTS PROVIDED?	Waiver Information	Provide Rationale Here to Support Waiver Request
Total Organic Carbon (TOC)	NONE	I request a waiver for this parameter based on the following rationale:	effluent not expected in discharge
Ammonia Nitrogen (as N)	NONE	I request a waiver for this parameter based on the following rationale:	effluent not expected in discharge
Total Suspended Solids	NONE	I request a waiver for this parameter based on the following rationale:	effluent not expected in discharge
Temperature, Summer	NONE	I request a waiver for this parameter based on the following rationale:	effluent not expected in discharge
Temperature, Winter	NONE	I request a waiver for this parameter based on the following rationale:	Pool closed for season
pH	DMR		
Total Dissolved Solids	NONE	Waiver request not required.	
Total Phosphorus (as P)	NONE	Waiver request not required.	
Fecal Coliform Bacteria	NONE	Waiver request not required.	
Escherichia coli	NONE	Waiver request not required.	
Total Residual Chlorine	DMR		
Dissolved Oxygen	NONE	Waiver request not required.	
Oil & Grease	NONE	Waiver request not required.	

CORRECTION REQUEST (APPROVED)

Effluent Characteristics

All applicants are required to report BOD5/CBOD5, COD, TOC, ammonia (as N), TSS, pH, TRC, and Temperature or request waivers for reporting these parameters. For facilities with pools, only pH and TRC are required, and the applicant can request waivers for the other conventional pollutants. Please select "NONE" for BOD5, COD, TOC, Ammonia Nitrogen (as N), TSS, and temperature. For the waiver rationale question, please enter 'effluent not expected in discharge'. Please ensure that only pH and TRC have DMR selected.

Created on 9/30/2025 10:39 AM by **Anne Wisner**

Please attach lab reports for conventional pollutants here.

NONE PROVIDED

NONE PROVIDED

6. EFFLUENT CHARACTERISTICS - TOXIC POLLUTANTS

Instructions: Carefully review each of the toxic pollutant groups below and respond as appropriate. For guidance concerning test procedures, see Part II.B.2. of your NPDES permit.

Tables 1 – 6, referenced below, are located in the Appendix.

[CLICK HERE to open the Appendix to the Permit Application](#)

DIOXIN AND FURAN CONGENER INFORMATION

Existing industries that use or manufacture 2,3,5-trichlorophenoxy acetic acid (2,4,5-T); 2-(2,3,5-trichlorophenoxy) propanoic acid, (Silvex, 2,3,5-TP); 2-(2,4,5-trichlorophenoxy) ethyl 2,2-dichloropropionate (Erbon); 0,0-dimethyl 0-(2,4,5-trichlorophenyl) phosphorothionate (Ronnel); 2,4,5-trichlorophenol (TCP); or hexachlorophrene (HCP), or knows or has reason to believe that 2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) is present in the facility's effluent, are required to submit the results of at least one effluent analysis for the dioxin and furan congeners listed in Table 6. All effluent analyses for dioxin and furan congeners shall be conducted using USEPA Method 1613. In addition, submit the results of all other effluent analyses performed within the last three (3) years for any dioxin and furan congener listed in Table 6.

Do you have analytical results of this type to report?

NO

OTHER INDUSTRY PRIORITY POLLUTANT INFORMATION

Existing secondary industries or existing primary industries that discharge nonprocess wastewater are required to submit the results of at least one effluent analysis for any chemical listed in Tables 2 and 3 known or believed to be present in the facility's effluent. In addition, submit the results of all other effluent analyses performed within the last three years for any chemical listed in Tables 2 and 3.

Do you have analytical results of this type to report?

NO

INJURIOUS CHEMICALS NOT PREVIOUSLY REPORTED

Existing industries are required to provide a measured or estimated effluent concentration for any toxic or otherwise injurious chemicals known or believed to be present in the facility's effluent that has not been previously identified in this Application. Quantitative effluent data for these chemicals that are less than five years old shall be reported.

Do you have analytical results of this type to report?

NO

ADDITIONAL TOXIC AND OTHER POLLUTANT INFORMATION

All existing industries, regardless of discharge type, are required to provide the results of at least one analysis for any chemical listed in Table 4 known or believed to be present in the facility's effluent, and a measured or estimated effluent concentration for any chemical listed in Table 5 known or believed to be present in the facility's effluent. In addition, submit the results of any effluent analysis performed within the last three years for any chemical listed in Tables 4 and 5.

Do you have analytical results of this type to report?

NO

[Appendix to the Permit Application](#)

***Please note: This form may have a glitch. When you click **Add New**, it may cause the Conventional Pollutant table to not be changeable. To fix it, click into another Section, such as Additional Information, and then click back into this Section (Outfall Information and Effluent Characteristics), click into the Outfall you were adding/editing, and the table will work as intended. ***

Water Treatment Additives

Water Treatment Additives (WTAs)

Approvals to use WTAs are authorized by the Michigan Department of Environment, Great Lakes, and Energy under separate correspondence. Issuance of a permit/COC does not authorize the use of water treatment additives. Written approval from the Department must be obtained prior to using water treatment additives at the facility.

Water treatment additives (WTAs) include any material that is added to water used at the facility or to wastewater generated by the facility to condition or treat the water. Examples of WTAs include biocides, flocculants, water conditioners, pH adjusting agents, etc.

Are any WTAs added to water used at the facility or to wastewater generated by the facility?

YES

CORRECTION REQUEST (APPROVED)

Water Treatment Additives

This application mentions that this facility will be chlorinating and dechlorinating the pool water. Both of these agents are considered Water Treatment Additives (WTAs) and must be approved by EGLE. Please change your answer to **Yes** to the question **Are any WTAs added to water used at the facility or to wastewater generated by the facility?** and list all WTAs that may be present in the discharge. You will also need to submit WTA request forms for each additive and receive approval prior to discharging additives after permit reissuance. Please let me know if you need assistance with finding or filling out WTA request forms.

Created on 9/30/2025 10:42 AM by **Anne Wisner**

NOTE (CREATED)

Water Treatment Additive Approval

This application mentions that this facility will be chlorinating and dechlorinating the pool water. Both of these agents are considered Water Treatment Additives (WTAs) and must be approved by EGLE. Please change your answer to **Yes** to the question **Are any WTAs added to water used at the facility or to wastewater generated by the facility?** and list all WTAs that may be present in the discharge. You will also need to submit WTA request forms for each additive and receive approval prior to discharging additives after permit reissuance. [Appendix to the Permit Application](#)

Storm Water

Important Terms Used in the Storm Water Section:

?? "STORM WATER" means storm water runoff, snow melt runoff, and/or surface runoff and drainage.

?? "SURFACE WATER OF THE STATE" means the Great Lakes and their connecting waters, and all inland lakes, rivers, streams, impoundments, open drains, wetlands, and other surface bodies of water within the confines of the state not including drainage ways and ponds used solely for wastewater conveyance, treatment, or control.

?? "SPECIAL-USE AREA" is defined as any of the following:

1. Secondary containment structure required by state or federal law
2. Area identified as a site of environmental contamination pursuant to Part 201, Environmental Remediation, or Part 213, Leaking Underground Storage Tanks, of the NREPA. If a Baseline Environmental Assessment (BEA) has been submitted to EGLE, the site is regulated under Part 201 or Part 213.
3. A facility that EGLE has determined is a significant contributor of pollutants to surface waters of the state.

Please confirm that you have read all terms and their definitions above:

I Confirm

Is the storm water from this facility discharged to a surface water of the state, either directly or through another conveyance such as a municipal separate storm sewer system? IMPORTANT: You may select "NO" here ONLY IF the storm water is discharged to a municipal combined storm sewer system, a municipal wastewater treatment system, or a privately-owned activated sludge treatment system.

YES

CORRECTION REQUEST (APPROVED)

Discharging to Surface Waters of the State

Please change select "Yes" for this question, as this facility will be discharging into a surface water of the state (Traver Creek).

Created on 9/30/2025 10:43 AM by **Anne Wisner**

The applicant must determine whether this facility is engaged in a regulated "industrial activity" as defined in 40 CFR 122.26(b) (14).

TO MAKE THIS DETERMINATION, carefully review the document named "Primary Activities & Standard Industrial Classification (SIC) Codes," available at the link below.

[CLICK HERE to review the document](#)

Please confirm that you have reviewed the document referenced above:

I Confirm

Is this facility engaged in a regulated industrial activity according to the document referenced above?

NO

PFAS

??The purpose of this section is to determine whether the applicant must submit sample results for per- and polyfluoroalkyl substances (PFAS).

"Surface waters of the state" means all of the following: The Great Lakes and their connecting waters, all inland lakes, rivers, streams, impoundments, open drains, wetlands, and other surface bodies of water within the confines of the state but does not include drainage ways and ponds used solely for wastewater conveyance, treatment, or control.

1. Is this facility known to have PFOS and/or PFOA present in wastewater discharged to surface waters of the state?

NO

2. Is this facility a landfill for solid or hazardous waste with a discharge of leachate to a surface water of the state?

NO

3. Is this facility a metal finisher that discharges wastewater associated with this activity to a surface water of the state?

NO

4. Is the discharge from the remediation of a contaminated site to a surface water of the state?

NO

5. Does the facility manufacture paper, corrugated paper, cardboard, paperboard, or packaging paper (coated or uncoated), and discharge wastewater associated with this activity to a surface water of the state?

NO

6. Does the facility conduct car washing as all or part of its operations and discharge car wash wastewater to a surface water of the state?

NO

7. Is this facility a commercial industrial laundry that discharges wastewater associated with this activity to a surface water of the state?

NO

8. Is this facility a chemical manufacturer with a discharge of wastewater associated with this activity to a surface water of the state?

NO

9. Has Aqueous Film-Forming Foam (AFFF) ever been used at the facility for training or testing, or to respond to a fire emergency? Has AFFF ever been stored at this facility? If yes to either, please select "YES."

NO

10. Does this facility manufacture, formulate, or mix paints/pigments and discharge wastewater from these operations to a surface water of the state?

NO

11. Does this facility have a discharge from a leather or hide tanning/finishing operation to a surface water of the state?

NO

12. Does this facility perform carpet and/or upholstery cleaning and discharge wastewater from these operations to a surface water of the state?

NO

13. Is the facility a carpet, rug, or textile manufacturer that discharges wastewater associated with this activity to a surface water of the state?

NO

14. Is this facility a centralized waste treater? Centralized Waste Treaters treat or recover metal-bearing, oily, and organic wastes, wastewater, or used material received from off site, and are regulated under 40 CFR Part 437.

NO

15. Does this facility apply a stain-, dirt-, water-, or fire-resistant coating and/or protectant, and discharge wastewater associated with this activity to a surface water of the state?

NO

COC Renewal Fee

75

Please note, if you mistakenly select the incorrect fee, underpayments result in the application being administratively incomplete and if you over pay, refunds for the overpayment take additional time to process. Also, only pay the NPDES application fee one time: If you are prompted to pay when REVISING a previously submitted application, do not pay the application fee a second time.

Fee Amount

75

Agreements and Signature(s)

SUBMISSION AGREEMENTS

- I am the owner of the account used to perform the electronic submission and signature.
- I have the authority to submit the data on behalf of the facility I am representing.
- I agree that providing the account credentials to sign the submission document constitutes an electronic signature equivalent to my written signature.
- I have reviewed the electronic form being submitted in its entirety, and agree to the validity and accuracy of the information contained within it to the best of my knowledge.

APPLICATION CERTIFICATION

*Rule 323.2114(1-4), promulgated under the Michigan Act, requires that this form must **must be electronically-signed, backed by a certifier agreement form with a wet-ink signature from one of the following:***

A. For an organization, company, corporation, or authority, by a principal executive officer, vice president, or higher

B. For a partnership, by a general partner

C. For a sole proprietor, by the proprietor

D. For a municipal, state, or other public facility, by a principal executive officer or ranking elected official (e.g., mayor, village president, city or village manager, or clerk)

Note: If the signatory is not listed above, but is authorized to sign the Application, please provide documentation of that authorization.

"I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for having knowledge of violations."

I understand that my e-signature constitutes a legal agreement to comply with the requirements of the NPDES Permit. I certify under penalty of law that I possess full authority on behalf of the legal owner/permittee to sign and submit this Application.
