Dear Mayor Taylor,

I'm a grandmother who fears for my family in a warming world.

I am writing to urge you to support the passage of the Clean Energy Future package of bills, which will have beneficial effects for your constituents.

70% of the people in Michigan accept the scientific reality of the climate crisis, and 62% are actively "worried" about it, according to the exhaustive Yale Climate Opinion Map.

The Clean Energy Future package of bills will soon come before the Michigan state legislature for a vote. HB 4759/SB 271 mandates that Michigan reach 100% carbon-free energy by 2035 or 2040; HB 4760/SB 502 expands the authority of the Michigan PSC to make our energy affordable, reliable, and clean; and HB 4761/SB 273 requires efficiency standards for utilities and expand programs for low-income households.

No longer hypothetical, climate change left citizens suffering from floods, tornadoes, and Canadian wildfire smoke this summer. Local communities feel the most impact from extreme events. This package will reduce our emissions and move us toward clean energy. It will also enhance public health and bring economic benefits of sustainable technology to our state, attracting business and stemming population loss.

I strongly urge you as a public official to endorse the passage of these bills.

Sincerely,

Cathleen Burton

Subject: ICPOC Student Representative
Date: Monday, October 2, 2023 7:16:29 PM

Chair Carter,

It has been longer than I can believe since I was a student at U-M, but during my time on campus the then-Michigan Student Assembly had a student Public/Campus Safety Liaison whose role it was to engage with the City and University on issues of public safety. I'm not sure if the now-Central Student Government has a similar position, but it may be worth reaching out to see if they have any suggested applicants. The CSG Student Leadership can be reached at csg.contact@umich.edu, and their staff support, Jim Hoppes, can be reached at jahoppes@umich.edu.

Best of luck in filling this position.

All the Best,
Travis

Hi Rob,

This is always such fun! I'm not available that day. Thursdays for this entire semester are very tight and Tuesdays are impossible.

I have more flexibility on Fridays when I am in town.

Hello Lisa,

It's been almost a year since had you on Ward Talk and would love for to stop by the studio and fill us in on everything going on in Ward 1 and the city at large.

So right now I'm trying to fill a spot for Thursday October 19th. As usual we would be done in under an hour, and we could start around 1pm, or a little earlier/later if needed.

Just let me know if you are free that day; THANKS!

Dear Council Member Cornell,

I'm a poet, artist, and concerned aunt who fears for my family in a warming world.

I am writing to urge you to support the passage of the Clean Energy Future package of bills, which will have beneficial effects for your constituents.

70% of the people in Michigan accept the scientific reality of the climate crisis, and 62% are actively "worried" about it, according to the exhaustive Yale Climate Opinion Map.

The Clean Energy Future package of bills will soon come before the Michigan state legislature for a vote. HB 4759/SB 271 mandates that Michigan reach 100% carbon-free energy by 2035 or 2040; HB 4760/SB 502 expands the authority of the Michigan PSC to make our energy affordable, reliable, and clean; and HB 4761/SB 273 requires efficiency standards for utilities and expand programs for low-income households.

No longer hypothetical, climate change left citizens suffering from floods, tornadoes, and Canadian wildfire smoke this summer. Local communities feel the most impact from extreme events. This package will reduce our emissions and move us toward clean energy. It will also enhance public health and bring economic benefits of sustainable technology to our state, attracting business and stemming population loss.

I strongly urge you as a public official to endorse the passage of these bills.

Sincerely,

Annette Hakiel

The Clean Energy Future package of bills will soon come before the Michigan state legislature for a vote. HB 4759/SB 271 mandates that Michigan reach 100% carbon-free energy by 2035 or 2040; HB 4760/SB 502 expands the authority of the Michigan PSC to make our energy affordable, reliable, and clean; and HB 4761/SB 273 requires efficiency standards for utilities and expand programs for low-income households.

No longer hypothetical, climate change left citizens suffering from floods, tornadoes, and Canadian wildfire smoke this summer. Local communities feel the most impact from extreme events. This package will reduce our emissions and move us toward clean energy. It will also enhance public health and bring economic benefits of sustainable technology to our state, attracting business and stemming population loss.

I strongly urge you as a public official to endorse the passage of these bills.

Sincerely,
Matthew Vollrath

Dear Mayor Taylor,

I'm a retired Natural Resources Chief Information Officer who fears for my family in a warming world.

I am writing to urge you to support the passage of the Clean Energy Future package of bills, which will have beneficial effects for your constituents.

70% of the people in Michigan accept the scientific reality of the climate crisis, and 62% are actively "worried" about it, according to the exhaustive Yale Climate Opinion Map.

The Clean Energy Future package of bills will soon come before the Michigan state legislature for a vote. HB 4759/SB 271 mandates that Michigan reach 100% carbon-free energy by 2035 or 2040; HB 4760/SB 502 expands the authority of the Michigan PSC to make our energy affordable, reliable, and clean; and HB 4761/SB 273 requires efficiency standards for utilities and expand programs for low-income households.

Dear Councilmember Eyer,

I'm a 26-year-old who is terrified to see my future slipping into oblivion with each ton of toxic emissions we are blindly spewing into our atmosphere.

I am writing to urge you to support the passage of the Clean Energy Future package of bills, which will have beneficial effects for your constituents.
