We support the **Ann Arbor Resolution for Inclusion of Natural Features Sustainability**. We want the city to prioritize the importance of natural features and biodiversity when considering higher density housing. We really struggle to understand how adding 95,000 new residents (per one document we saw) is going to make our city a better place to live. Our roads will be congested and instead of seeing green, peaceful views, we are going stuck seeing multistory housing everywhere we look. That's not positive progress by any definition.

Thank you,

James & Dawn Meyer
