Subject: 1140 Broadway proposal

Dear Ann Arbor Planning Commission,

I live near the proposed development, and walk or ride my bike through there almost daily. I am very motivated to have more housing in that area because of its pedestrian-friendly location, so our community can reduce reliance on cars and make progress towards our climate action goals. I feel the design is attractive and in keeping with the surrounding development. I have listened to various perspective (including the resources at <https://annarborlowertown.wordpress.com/1140-broadway-proposal/>) and would like to register my support of the project. I believe both the local area and the region will benefit.

Sincerely,
Barbara Lucas
