Hi Raymond. Based on the crash data that is attached to the agenda, it looks like we did not include a bicycle crash that happened at the US23 off ramp. The cyclist was going east on Washtenaw and was struck by a vehicle turning right onto Washtenaw. The incident number is 220035959 in case you want to look up more details.

Was this incorrectly excluded from the 2022 statistics? Or is there a reason for excluding it?

Thanks

Pete
