Any breach under this paragraph is considered a material breach.

Contractor, its employees, and agents will not be considered employees of the State. No partnership or joint venture relationship is created by virtue of this Contract. 10. **Subcontracting.** Contractor may not delegate any of its obligations under the Contract without the prior written approval of the State. Contractor must notify the State at least 90 calendar days before the proposed delegation, and provide the State any information it requests to determine whether the delegation is in its best interest. 15. **Ordering.** Contractor is not authorized to begin performance until receipt of authorization as identified in Schedule A.
16. **Acceptance.** Contract Activities are subject to inspection and testing by the State within 30 calendar days of the State's receipt of them ("**State Review Period**"), unless otherwise provided in Schedule A. If the Contract Activities are not fully accepted by the State, the State will notify Contractor by the end of the State Review Period that either: (a) the Contract Activities are accepted, but noted deficiencies must be corrected; or (b) the Contract Activities are rejected. If the State finds material deficiencies, it may: (i) reject the Contract Activities without performing any further inspections; (ii) demand performance at no additional cost; or (iii) terminate this Contract in accordance with Section 23, Termination for Cause.

Within 10 business days from the date of Contractor's receipt of notification of acceptance with deficiencies or rejection of any Contract Activities, Contractor must cure, at no additional cost, the

deficiency and deliver unequivocally acceptable Contract Activities to the State. If acceptance with deficiencies or rejection of the Contract Activities impacts the content or delivery of other non-completed Contract Activities, the parties' respective Program Managers must determine an agreed to number of days for re-submission that minimizes the overall impact to the Contract. However, nothing herein affects, alters, or relieves Contractor of its obligations to correct deficiencies in accordance with the time response standards set forth in this Contract.

If Contractor is unable or refuses to correct the deficiency within the time response standards set forth in this Contract, the State may cancel the order in whole or in part. The State, or a third party identified by the State, may perform the Contract Activities and recover the difference between the cost to cure and the Contract price plus an additional 10% administrative fee.

If the State rejects the Contract Activities, Contractor must remove them from the premises within 10 calendar days after notification of rejection. The risk of loss of rejected or non-conforming Contract Activities remains with Contractor. Rejected Contract Activities not removed by Contractor within 10 calendar days will be deemed abandoned by Contractor, and the State will have the right to dispose of it as its own property. Contractor must reimburse the State for costs and expenses incurred in storing or effecting removal or disposition of rejected Contract Activities.
19. **Warranty Period.** The warranty period, if applicable, for Contract Activities is a fixed period commencing on the date specified in Schedule A. If the Contract Activities do not function as warranted during the warranty period the State may return such non-conforming Contract Activities to the Contractor for a full refund.
20. **Terms of Payment.** Invoices must conform to the requirements communicated from time-to-time by the State. All undisputed amounts are payable within 45 days of the State's receipt. Contractor may only charge for Contract Activities performed as specified in Schedule A. Invoices must include an itemized statement of all charges. The State is exempt from State sales tax for direct purchases and may be exempt from federal excise tax, if Services purchased under this Agreement are for the State's exclusive use. Notwithstanding the foregoing, all prices are inclusive of taxes, and Contractor is responsible for all sales, use and excise taxes, and any other similar taxes, duties and charges of any kind imposed by any federal, state, or local governmental entity on any amounts payable by the State under this Contract.

The State has the right to withhold payment of any disputed amounts until the parties agree as to the validity of the disputed amount. The State will notify Contractor of any dispute within a reasonable time. Payment by the State will not constitute a waiver of any rights as to Contractor's continuing obligations, including claims for deficiencies or substandard Contract Activities. Contractor's acceptance of final payment by the State constitutes a waiver of all claims by Contractor against the State for payment under this Contract, other than those claims previously filed in writing on a timely basis and still disputed.

The State will only disburse payments under this Contract through Electronic Funds Transfer (EFT). Contractor must register with the State at <http://www.michigan.gov/SIGMAVSS> to receive electronic fund transfer payments. If Contractor does not register, the State is not liable for failure to provide payment. Without prejudice to any other right or remedy it may have, the State reserves the right to set off at any time any amount then due and owing to it by Contractor against any amount payable by the State to Contractor under this Contract.

21. **Liquidated Damages.** Liquidated damages, if applicable, will be assessed as described in Schedule A.
22. **Stop Work Order.** The State may suspend any or all activities under the Contract at any time. The State will provide Contractor a written stop work order detailing the suspension. Contractor must comply with the stop work order upon receipt. Within 90 calendar days, or any longer period agreed to by Contractor, the State will either: (a) issue a notice authorizing Contractor to resume work, or (b) terminate the Contract or purchase order. The State will not pay for Contract Activities, Contractor's lost profits, or any additional compensation during a stop work period.

Any reference to specific breaches being material breaches within this Contract will not be construed to mean that other breaches are not material.

If the State terminates this Contract under this Section, the State will issue a termination notice specifying whether Contractor must: (a) cease performance immediately, or (b) continue to perform for a specified period. If it is later determined that Contractor was not in breach of the Contract, the termination will be deemed to have been a Termination for Convenience, effective as of the same date, and the rights and obligations of the parties will be limited to those provided in Section 24, Termination for Convenience.

The State will only pay for amounts due to Contractor for Contract Activities accepted by the State on or before the date of termination, subject to the State's right to set off any amounts owed by the Contractor for the State's reasonable costs in terminating this Contract. The State will notify Contractor in writing if indemnification is sought; however, failure to do so will not relieve Contractor, except to the extent that Contractor is materially prejudiced. Contractor must, to the satisfaction of the State, demonstrate its financial ability to carry out these obligations.

The State is entitled to: (i) regular updates on proceeding status; (ii) participate in the defense of the proceeding; (iii) employ its own counsel; and to (iv) retain control of the defense if the State deems necessary. Contractor will not, without the State's written consent (not to be unreasonably withheld), settle, compromise, or consent to the entry of any judgment in or otherwise seek to terminate any claim, action, or proceeding. To the extent that any State employee, official, or law may be involved or challenged, the State may, at its own expense, control the defense of that portion of the claim.

INTIMIDATOR™ 19XPC

19" Capacity Hand-Fed Chipper

The Intimidator 19XPC is a powerful drum-style chipper that can **easily handle big limbs, forked material and whole trees. It's an extremely versatile chipper**, with one large 15-3/4" diameter top feed wheel, the 19XPC has the power to pull in the largest limbs and even whole trees. With its **solid steel welded construction**, proven feed system, durable components, and chip throwing technologies, the Intimidator 19XPC is a favorite for tree services needing a high-capacity chipper that's easy to maneuver.

DURABLE AND POWERFUL.

- **Aggressive whole tree chipping power** in a maneuverable package
- **Large 37" diameter reinforced chipping drum**
- **Wide 20-1/2" x 20-7/8" opening** for processing large limbs and whole trees

The Most Powerful Feed System Available

The Intimidator 19XPC features Bandit's most powerful feed system available. The Slide Box Feed System features a massive 25" wide by 15-3/4" diameter top feed wheel powered by a chain drive system, and a 25" wide by 10-5/8" diameter bottom feed wheel roller, generating an astonishing 10,824.32 lb-ft of pulling power. This means larger material is pulled in easier, reducing the time and labor costs for trimming while increasing production.

Excels at Chipping Large Diameter Materials

The large 37" diameter drum allows much of the material to be chipped on the bottom half of the drum, with the grain of the wood like a disc-style chipper. Large limbs and whole trees are chipped using less energy and with less vibration, maximizing fuel economy and reducing maintenance. The large chipper opening and sloped infeed system makes it easy to feed large logs, and whole trees into the chipper. And with aggressive engine options over 200 horsepower, the Intimidator 19XPC has plenty of power to tackle big projects.

Significantly Less Maintenance

The Intimidator 19XPC has a heavy, reinforced drum with internal baffles. The chipper drum and shaft should last the lifetime of the chipper and are backed by a five-year GUTS warranty. Rugged construction and heavy-duty components throughout the Intimidator 19XPC help ensure long life and trouble-free performance. We realize what it costs when a chipper is down, and though we can't eliminate all downtime, we do our best to minimize it.

Higher Quality Chips Per Load

The Intimidator 19XPC throws chips with more force due to the pocket design, the larger drum diameter, smooth transition, smooth discharges and the patented Power Slot. This means more chips per load and fewer trips to the dump site. It also means chips from a Bandit chipper have better uniformity compared to rival machines, commanding higher prices when sold and making them easier to dispose of.

Slide Box Feed System

This unique system allows the top feed wheel to move straight up and down with the flow and diameter of material passing through the feed system into the chipper. The slide box feed system provides direct down pressure for crushing material. Included within the slide box, is the patented spring tensioning system along with the hydraulic lift cylinder providing additional down pressure for unmatched pulling and compressing power making the unit easier to feed and more productive.

MODEL 2600

74-HP Towable Stump Grinder

For operators who prefer the simplicity of a **towable stump grinder** but are tired of constant belt adjustments and maintenance, the Model 2600 is an exceptional choice. This machine combines **aggressive horsepower** in a compact, lightweight design that makes stump grinding as easy as ready, set, tow! Available with numerous options and reliable, beltless hydrostatic drive, the Model 2600 is an **exceptional performer** for rental companies, municipalities, and stump grinding professionals.

MINIMAL DOWNTIME. MAXIMUM PRODUCTIVITY.

- Low-maintenance **hydrostatic drive**
- **74-horsepower** diesel engine options
- Available with **radio remote control**

As Easy as Tow-and-Go

The Model 2600 rides on a heavy-duty 5,200-pound Torflex axle and goes after stumps with a wide 68" swing arc for **minimal repositioning**. It can reach up to 27-½" and cut to a depth of 22" to handle large stumps with ease. It features the Revolution cutterwheel which delivers **maximum cutting power** with exceptional chip containment. The Model 2600 also features a standard 48" telescoping tongue to help fine-tune position at stump.

Direct Power At Your Fingertips

Powering the Model 2600 is a CAT or Perkins 61-horsepower Tier 4i diesel engine. With hydrostatic direct-drive, there are no belts, jackshafts, bearings or associated parts to maintain, making the operation and maintenance of these machines **extremely simple**. Power application with hydrostatic direct-drive is typically much smoother than traditional belt drive, making the Model 2600 a **breeze to operate**. All machine functions are controlled via a swing-out operator's console; a wireless radio remote is optional.

Proven Reputation for Service & Support

Bandit stump grinders have earned the reputation of being **the best economical decision** you can make for a long-term investment stump grinder. Backed by a factory and worldwide dealer support network for parts and service, your Bandit will remain a valuable asset to your fleet.
