This morning I read Adam Goodman's written comments to the Transportation Commission regarding the East Medical Center Drive bridge proposal. As someone who bikes to the hospital for frequent medical appointments and travels through this intersection on all modes regularly and I agree with his observations and feedback, entirely.

Please have the backbone to support our goal of reducing Vehicle Miles Travelled in service of our climate goals and use our negotiating leverage with the University on this issue to encourage them to take transportation demand management the hospital seriously.
