

## Sustainability and Innovations

### MEMORANDUM

To: Milton Dohoney Jr., City Administrator

From: Missy Stults, Sustainability and Innovations Director

Date: June 15, 2022

Subject: A Resolution to Approve a Power Purchase Agreement with Enerlogics Networks, LLC, for the Installation, Operation, and Maintenance of Solar at City Facilities

---

Before City Council on June 21<sup>st</sup> is File# 22-0878, a proposed Resolution to Approve a Power Purchase Agreement with Enerlogics Networks, LLC, for the Installation, Operation, and Maintenance of Solar at City Facilities. This resolution and the associated contract, known as a Power Purchase Agreement (PPA), would support the installation of just over 3MW of solar at seven city locations. These systems are a combination of ground mounted and roof mounted systems.

Unfortunately, I will not be able to attend the June 21<sup>st</sup> Council meeting due to a long-standing family commitment. As such, I've created [this 6-minute video](#) that provides a bit more detail about the proposed contract before Council. This video is in addition to the memorandum that accompanies the resolution and is intended to provide some additional information to Council as you deliberate on this item.

At City Council on Tuesday night will be Simi Barr from OSI who can speak about some to the technical designs, Attorney Valerie Brader and Attorney Tim Wilhelm that can speak to the contract, and Scott Ameduri from Enerlogics Networks, LLC.

Thanks for considering this resolution and best of luck at the June 21<sup>st</sup> meeting.  
Missy Stults
