Subject: Redeemer Site Plan public hearing

To all planning commissioners and planning staff:

I may be unable to attend in person or call into the meeting, so this email constitutes my support for the proposed Landscape Site Modification and Special Exception Use.

ETRAKIT Project Numbers: SP21-045, SEU21-006

I am especially pleased with the proposed reuse of the former Treasure Mart buildings, and restoration of the building's exterior features, such as returning the original window openings to the exterior walls. The site has had no improvements for decades, and what is proposed is a welcome and substantial improvement to the property.

I believe that church use for assembly is compatible within our residential neighborhood, and that the people involved are sincere in their goals and desires to become good neighbors.

Thank you for your consideration.
