RE: QWICK KURB[®] Distribution in State of Michigan

TO WHOM IT MAY CONCERN:

We certify that we are the manufacturing distributor and sole licensee in North America of the traffic separator system, known in the U. S. and Canada since 1995 as QWICK KURB[®], including the Continuous Raised Separator (L60 and End Curbs L61 & L62) and verticals such as the L84 Work Zone Upright, L104 Mega Marker[™] and L125shM MASH Bollard[™] and various mounting accessories (L50 base plate and L54 Stand Alone Base). There are relevant patents and trademarks that we hold (US Patents 7,325,999 B1 and US 6,220,780 B1)

The system has NCHRP 350 and MASH-16 Acceptance Letters from FHWA and independent laboratory test reports evidencing over 3500 psi crush resistance. There are no comparable longitudinal channelizer systems in existence.

In Michigan, our exclusive distribution partner is Carrier & Gable, 24110 Research Drive, Farmington Hills, MI 48335 (John Carrier, 248-477-8700). There are no other dealers authorized to sell in either state.

Carrier & Gable can provide you with all of the QWICK KURB product line that is compatible with QWICK KURB product previously installed throughout Michigan.

Sincerely yours,

Matthew Schindler
President
