

## **Company History**

Laura Dobbs and Bryan Dobbs founded PPM Tree Service & Arbor Care, LLC. on August 22, 2016, focused primarily on tree healthcare.

PPM Tree Service & Arbor Care, LLC. saw value in servicing the industry directly and decided to provide residential and commercial tree services. This included hazardous tree removal and trimming services with a focus on residential and commercial standard tree pruning services.

In 2019, we focused our strategic plan on reviewing and bidding on municipality work and signed a contract with the City of Westland, providing tree removal and trimming services for the city. In 2022, we sponsored a local event in the city called Blues, Brews, and BBQ, an annual event hosted by the city to provide residents with a free local festival.

In 2019, we started servicing B&M Ashman, Inc., allowing us to partner with a telecommunications maintenance provider. We provide tree trimming services for this company to allow them access to utility poles used by Comcast Cable for routine and emergency maintenance. This experience gave us the idea to take PPM Tree Service & Arbor Care, LLC. to the next stage. In June 2019, we partnered with the Washtenaw County Water Commissioner. This allowed us to provide land-clearing services to the county providing them with better access to the waterways for maintenance.

With the efforts of our strategic focus on these two areas of expansion, it is a significant reason why PPM Tree Service & Arbor Care, LLC not only survived during the COVID-19 pandemic but grew. It allowed us to keep our business operations and crews working to maintain the necessary infrastructure to keep other businesses functional.

In 2021, we were approached by another telecommunications provider, Kanaan Communications, to expand our business profile for utility maintenance by 25% annually.

## PPM Tree Service & Arbor Care, LLC.

2023 provided us with more opportunities to bid on municipality work while continuing our partnerships made over the last five years as well as our long-time residential and commercial customers. In late 2022 we signed a contract with the township of Canton and the township of Ypsilanti to provide tree trimming, removal, and 24-emergency services to the city in which Laura and Bryan reside with their family. In 2023, we signed a contract with the City of Romulus providing tree removal, trimming services, and 24-hour emergency services to the city.

We believe this is only the start of the great company we will continue to grow into and hopefully pass it down to our future generations if they desire to take part.
