Hi, Marissa—after meetings with your organization and with the applicant, the following has been arranged:

- 1) It is noted that the University is not affiliated with this event
- 2) One lane of Hoover will open shortly after the start of the race for emergency vehicle access
- 3) Bus route adjustments have been noted—Keech will be completely open shortly after the beginning of the race
- 4) The applicant will direct participants to use the Pioneer parking lot, though people may still choose to take advantage of Sunday's free parking
- 5) The beer tent will be placed further away from the Stadium, on East Davis
- 6) The applicant has made adjustments to their website to further distance the University as possible affiliates with this event
- 7) The hard stop for this event is 1:30; participants will be moved to sidewalks only as the race thins, allowing earlier opening of the streets

While this is not the perfect solution, I hope this helps.

Subject: Marathon 2019

Per our conversations - I just want to reemphasize the university concerns of this event in writing:

- UM being affiliated with the event --- The university is not affiliated with any portion of this event
- Emergency vehicle access being rerouted
- Bus routes being rerouted and/or cancelled routes
- Parking lots potentially not being available --- UM Athletic tournament schedule and/or repair work
- Safety concerns --- Minors, children, delayed emergency vehicle responses.

We'd prefer more the relocation of the alcohol tent moving East on Hoover between Greene and the railroad tracks. Our bus routes will be the most impacted by this due to having to completely reroute onto Main St (adding minutes) and/or cancelled... not the ideal situation. It does also impact emergency vehicle response as well.

Look forward to the final determination!
