

## **EXHIBIT A**

### Scope of the State and North University Design Process

As detailed in the funding items listed in Exhibit B, and as shown on the attached map, the State and North University Improvement Design process includes design for street resurfacing and watermain consolidation on State Street from South University Street to Washington Street and North University from State Street to Fletcher Street. In addition, the process includes streetscape, safety, and mobility improvements on State Street from William Street to Washington Street. To inform these improvements, the project includes site survey work, robust public engagement, traffic analysis and modeling, safety and vision zero analysis, preliminary design and construction documentation.
