Resolution Authorizing the S2 Grant Agreement

We request your approval of the attached agreement with the Michigan Department of Environmental Quality (MDEQ) for the City to accept an S2 Grant in the amount of \$273,083.40 for 90% of the costs to complete the application for a loan under the State Revolving Fund (SRF) program to finance the Facilities Renovations Project (FRP) at the City's Wastewater Treatment Plant (WWTP).

The purpose of the FRP is to construct the renovations identified in the Ann Arbor WWTP Facilities Master Plan. The WWTP Facilities Master Plan is a comprehensive, 25-year planning document that provides the basis and schedule for rehabilitation and replacement of major equipment at the WWTP. The older West Plant portion of the WWTP was first constructed in the 1930's and the newer East Plant was constructed in the late 1970's.

The West Plant has exceeded its useful life and was taken out of service in 2006 due to its dilapidated condition. Replacement of the West Plant is necessary for the WWTP to reliably meet current and future wastewater treatment capacity requirements. In addition to the complete demolition and replacement of the West Plant, the FRP includes miscellaneous renovations and improvements throughout the facility to maintain treatment viability and reliability. Construction of the FRP must be done without impeding the flow of wastewater into the WWTP or the plant's ability to effectively treat the flow in compliance with regulatory requirements.

Malcolm Pirnie, Inc. (MPI) was selected as the most qualified engineering firm to provide the engineering design services for the FRP. The design of the FRP has been complex and spanned a period of six years. Most recently, MPI has submitted design drawings and specifications to MDEQ for securing necessary permits. Once approved, the design documents will be used to solicit bids from qualified contractors, which is expected to take place this fall. In addition, MPI assisted the City in applying to MDEQ for a low interest loan under the SRF program to finance the FRP. The draft Project Priority List (PPL) for the SRF program that was recently released by MDEQ indicated the FRP is in the fundable range for fiscal year 2012, which begins October 1, 2011. The City will know whether the SRF loan is approved when the final PPL is released by MDEQ on or before October 1,

2011. Construction of the FRP will extend over five fiscal years and is estimated to cost \$80 million. The savings to the City by financing the FRP through the SRF program over the 20-year life of the loan will be in the range of approximately \$23 to \$33 million, depending on the interest rate for municipal revenue bonds.

On December 14, 2010, the State of Michigan enacted the S2 Grants Program. This program is to provide assistance to municipalities to complete the application for a loan under the SRF program. The costs eligible for the S2 Grant are for planning and design of sewage treatment works projects incurred on or after December 14, 2010. MDEQ released the S2 Grant Application on September 1, 2011, and is accepting administratively complete and non-deficient applications on a first come, first served basis. The eligible costs for which the City will apply are both the actual costs incurred by MPI since December 14, 2010, and the estimated costs expected to be incurred by MPI to complete the planning and design of the FRP. These costs total \$303,426.00, of which the S2 Grant would pay 90% (\$273,083.40) and the City would pay 10% (\$30,342.60).

The budget for this project is included in the approved capital budget and in the approved FY 11-16 CIP.
